ABOUT MGLS:2017

MGLS:2017 was the first study sponsored by NCES to follow a nationally representative sample of students as they entered and moved through the middle grades (grades 6 through 8). MGLS:2017 aims to enable an understanding of the development and learning that occur during students' middle-grade years (beginning in grade 6) and that are predictive of future success, along with the individual, social, and contextual factors that are related to successful development and academic achievement. The data collected provide a rich, descriptive picture of the experiences and lives of young adolescents during this critical time and permit researchers to examine associations between contextual factors and student outcomes. Because mathematics and literacy skills are important for preparing students for high school, later education, and career opportunities, the study focused on instruction and student growth in these areas.

In the 2017–18 school year (MS1), MGLS:2017 collected data for 14,281 cases where either the sixth-grade student or a parent participated, in 568 schools. The MGLS:2017 school and student samples were supplemented prior to the MS2 data collection in the 2019-20 school year due to low school response rates in MS1. In MS2, 562 of the original 568 schools participated, as well as 167 additional schools. A total of 15,478 students who had been enrolled in sixth grade in the 2017-2018 school year or their parents participated in MS2.

Students participated in in-school sessions facilitated by trained field staff or in a self-administered assessment via the web at home. Each student completed a direct assessment of mathematics, reading, and executive function skills important to learning. Students were also asked to complete a survey about school, social, and home experiences, and had their height and weight measured by field staff during the in-school student session.

The study also administered web-based surveys to school staff. School administrators answered questions about the characteristics of their school's population, staffing, programs, and academic supports and resources. Math teachers of students selected for the study were asked to complete surveys about their backgrounds and experience, their classrooms and instructional practices, and to rate the skills and abilities of specific students in the study. The special education teachers or related service providers for selected students with an Individualized Education Program (IEP) were asked to complete a survey about their backgrounds and the special education services they provided, and to rate the skills and abilities of specific students in the study. Field staff completed a school environment checklist that collected information on attributes of the school's physical environment, such as classroom setup, general upkeep, structure, and security.

A parent or guardian of each selected student was asked to complete a survey regarding household characteristics, their child's school and home life, and their engagement in their child's education.

Detailed information on study design and data elements, including the impact of COVID-19 school closures on the 2020 data collection methodologies, can be found in the *MGLS:2017 Data File User's Manual*.

HOW TO USE THIS DOCUMENT

This section defines the conventions and abbreviations used within this survey document.

Abbreviated Survey items: Item names of the items included in the Abbreviated Survey are marked with gray shading.

Rounds of data collection: MS1 refers to the baseline, grade 6 round of data collection. MS2 refers to the follow-up round of data collection when most students were in grade 8.

Respondent items are in mixed case.

Programmer instructions are in all capitals, in a box labeled “PROGRAMMER INSTRUCTIONS ON [ITEM NUMBER]” that immediately follows the item.

Routing logic is found in three places:

- An entry requirements box above each item, indicating which respondents receive an item. Some items were administered at MS2 only when a response was missing at MS1. Those items are marked with, “MS1 RESPONSE = NULL.” NE means “not equal to.”
- To the right of response options on items containing a single list of response options. This set of logic indicates which item a respondent is routed to upon selecting a particular response option. If a response option in this item type does not have an item number displayed to its right, it should be assumed that respondents were routed to the next consecutive item in the document.
- In the PROGRAMMER INSTRUCTIONS box following the item. If routing is more complex than can be readily indicated to the right of the response options, it is presented in a PROGRAMMER INSTRUCTIONS box directly following the item.

Respondents were routed to the next item unless otherwise specified. Missing responses follow the “No” response routing except as indicated.

Checkbox items or those marked with squares and an instruction to select all that apply are coded on the data file as 1 for items that were selected and 2 for items that were not selected. **Radio button items** or those marked with circles where only one response selection is permitted are coded on the data file with the number corresponding to the response option selected.

Item ranges are located under dropdowns and textboxes, indicating the minimum and maximum values respondents could enter for an item. Ranges that were presented as dropdowns are noted in a textbox with this symbol: ▼

String length limits are denoted with “STRING” after a text box, indicating the maximum number of characters a respondent could enter in a text box.

“Please specify” text boxes follow “Other” response options. In the programmed instrument, respondents only see the “Please specify” text boxes when they selected the “Other” response option directly above it.

Help text was available on certain items containing terms with which some respondents may have been unfamiliar. Terms where help text was available were identified on screen by a help icon .

Fills: Logic for item-specific wording fills is specified in a box immediately preceding the item and beneath the routing logic box. Text that varies between different respondents is represented by fills contained within square brackets in the question wording. For example, a “[he/she]” fill indicates that some respondents may see “he” and other respondents may see “she” in place of the fill when taking the survey. For another example, a “[most recent]” fill indicates that some respondents may see “most recent” and other respondents may not see any text in place of the fill.

Common wording fills are defined as follows:

- CNAME was the student’s full name.
- CFNAME, CMNAME, CLNAME, and CSUFFIX were the student’s first name, middle name, last name, and suffix, respectively.
- FNAME, MNAME, LNAME, and SUFFIX were the parent respondent’s first name, middle name, last name, and suffix, respectively.
- CADDRESS1, CADDRESS2, CCITY, CSTATE, and CZIP were the first line, second line, city, state, and zip code, respectively, of the student’s address.
- Student pronouns were filled based on parent response to item A050.
- Y_PARINCENTIVE was the incentive amount offered to parents.
- IDP1 and IDP2 referred to the primary parents or guardians in the household, where IDP1 was the primary parent or guardian and IDP2 was the spouse or partner of IDP1.
- HH#NAME and HH#AGE were the name and age, respectively, of the household member on the corresponding roster line.

Hard and soft checks were displayed when respondents left certain items blank or entered values out of range. Hard check messages required the respondent to provide a response. Soft check messages could be bypassed by the respondent without providing a response. Unless a hard check message is specified in the item’s programmer instructions box, respondents were able to leave that item blank.

In addition to seeing these form-specific hard and soft check messages, if a respondent skipped three questions in a row, left all items in a grid blank on a screen, or left two consecutive questions blank on a screen with multiple questions, a soft check was displayed:

“Your responses are very important. Please answer as many questions as possible.”

If a respondent left a specify field blank, a soft check was displayed:

“You have selected “Other” but have not provided a response to the “Please specify” prompt.”

NCES is authorized to conduct MGLS:2017 by the Education Sciences Reform Act of 2002 (ESRA 2002, 20 U.S.C. §9543) and to collect students' education records from education agencies or institutions for the purposes of evaluating federally supported education programs under the Family Educational Rights and Privacy Act (FERPA, 34 CFR §§99.31(a)(3)(iii) and 99.35). The data are being collected for NCES by RTI International, a U.S.-based nonprofit research organization. All of the information you provide may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (20 U.S.C. §9573 and 6 U.S.C. §151). The collected information will be combined across respondents to produce statistical reports.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this voluntary information collection is 1850-0911. Approval expires 11/30/2022. The time required to complete this information collection is estimated to average approximately 35 minutes per response, including the time to review instructions, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate, suggestions for improving this survey, or any comments or concerns regarding the status of your individual submission of this survey, please write directly to: The Middle Grades Longitudinal Study of 2017-18 (MGLS:2017), National Center for Education Statistics, Potomac Center Plaza, 550 12th St, SW, Room 4002, Washington, DC 20202.

PERM1. Thank you for being a part of the Middle Grades Longitudinal Study of 2017–18 (MGLS:2017). This will help us learn about children’s development during an important time in their lives.

Before we begin the parent survey, we see that you have not yet provided permission for your child to participate in the student session of MGLS:2017.

SCHOOL REQUIRES EXPLICIT PARENT CONSENT AND PARENT PERMISSION FORM IS MISSING AND SCHOOL ALLOWS ELECTRONIC PERMISSION AND CHILD IS PARTICIPATING IN THE IN-SCHOOL SESSION

PERM2. Your child’s school has accepted an invitation from the National Center for Education Statistics (NCES), part of the U.S. Department of Education, to participate in MGLS:2017. A sample of students from your child’s school will take part. Your child is one of approximately 20,000 students selected from across the United States to participate.

To have an accurate picture of what U.S. students in middle grades can do in reading, math, and other (noncognitive) skills important to learning, it is important that each student selected take part in the study. In addition to answering reading and math questions, students will be asked to complete a brief questionnaire about themselves and provide height and weight measurements, which is important to understanding the growth and development of adolescents. I urge you to support this effort by encouraging your child to take part.

SCHOOL REQUIRES EXPLICIT PARENT CONSENT AND PARENT PERMISSION FORM IS MISSING AND SCHOOL ALLOWS ELECTRONIC PERMISSION AND CHILD IS PARTICIPATING IN THE IN-SCHOOL SESSION

PERM3. Completing the survey is voluntary for you and your child and there are no penalties for not participating. Your child may also skip any question he or she does not want to answer. All of the information collected is protected, as required by law. NCES is authorized to conduct MGLS:2017 by the Education Sciences Reform Act of 2002 (ESRA 2002, 20 U.S.C. §9543) and to collect students’ education records from education agencies or institutions for the purposes of evaluating federally supported education programs under the Family Educational Rights and Privacy Act (FERPA, 34 CFR §§ 99.31(a)(3)(iii) and 99.35). The data are being collected for NCES by RTI International, a U.S.-based nonprofit research organization. All of the information your child provides may be used only for statistical purposes and may not be disclosed, or used, in identifiable form for any other purpose except as required by law (20 U.S.C. §9573 and 6 U.S.C. §151). The collected information will be combined across respondents to produce statistical reports.

HELP TEXT:

Biological or birth mother: Child's female biological parent. This may be the birth mother, but could also apply to a mother who used a surrogate mother to have her biological child.

Adoptive mother: The female who has taken the child into her own family by legal process to raise as her own child.

Step mother: The female other than the child's mother who is married to the child's father.

Foster mother: The female with whom the child is placed temporarily, usually through a social service agency and/or a court.

Female legal guardian: The female legally placed in charge of the affairs of the child.

Other female parent or guardian: This person acts as the mother of the child, but does not fit into one of the other categories. For example, in a household with two mothers, one of the mothers may not classify herself as biologically related and she may not be legally in charge of the affairs of the child even though she is another parent to the child. This category may also be used if a mother has a child through a surrogate mother, or with a donated egg, and does not classify the child as biologically related or adopted through a legal process.

Biological or birth father: Child's male biological parent. This could also apply to a father who used a surrogate mother to have his biological child.

Adoptive father: The male who has taken the child into his own family by legal process to raise as his own child.

Step father: The male other than the child's father who is married to the child's mother.

Foster father: The male with whom the child is placed temporarily, usually through a social service agency and/or a court.

Male legal guardian: The male legally placed in charge of the affairs of the child.

Other male parent or guardian: This person acts as the father of the child, but does not fit into one of the other categories. For example, in a household with two fathers, one of the fathers may not classify himself as biologically related and he may not be legally in charge of the affairs of the child even though he is another parent to the child. This category may also be used if a father has donated sperm, and does not classify the child as biologically related or adopted through a legal process.

Full sister: A female with whom the child shares the same biological parents.

Half sister: A female with whom the child shares one biological parent.

Step sister: A female to whom the child is unrelated except by the marriage of one parent.

Adoptive sister: A female to whom the child is unrelated except that they are in the same family in which she or the child has been legally adopted by the family.

Foster sister: A female to whom the child is unrelated except that they are in the same family in which she or the child have been taken into the home on a temporary basis and the parents have legal responsibility for the child.

Full brother: A male with whom the child shares the same biological parents.

Half brother: A male with whom the child shares one biological parent.

Step brother: A male to whom the child is unrelated except by the marriage of one parent.

Adoptive brother: A male to whom the child is unrelated except that they are in the same family in which he or the child has been legally adopted by the family.

Foster brother: A male to whom the child is unrelated except that they are in the same family in which he or the child have been taken into the home on a temporary basis and the parents have legal responsibility for the child.

Girlfriend or female partner of [CFNAME]'s parent/guardian: The female who has a "partner-like" relationship with one of the child's parents or guardians. "Living as married" is another way of describing the relationship.

Boyfriend or male partner of [CFNAME]'s parent/guardian: The male who has a "partner-like" relationship with one of the child's parents or guardians. "Living as married" is another way of describing the relationship.

Female guardian: The female placed in charge of the affairs of the child.

Male guardian: The male placed in charge of the affairs of the child.

Daughter/son of [CFNAME]'s parent's partner: The child of the person who has a "partner-like" relationship with one of the child's parents or guardians.

Other relative of [CFNAME]'s parent's partner: Some other relative of the person who has a "partner-like" relationship with one of the child's parents or guardians.

Other non-relative: If one of the codes for non-relative above does not better describe the relationship of the person to the child, and there is no family relationship through blood, marriage, adoption, or partnership (i.e., living together as married), use this code.

IDENTIFICATION OF PARENT 1 AND PARENT 2

- 1) IF THERE IS ONLY ONE MOTHER (OF ANY TYPE) AND ONLY ONE FATHER (OF ANY TYPE) IN THIS HOUSEHOLD, CODE THE MOTHER AS PARENT 1 (IDP1) AND CODE THE FATHER AS PARENT 2 (IDP2).
- 2) IF THERE IS ONLY ONE MOTHER (OF ANY TYPE) IN THE HOUSEHOLD, CODE THE MOTHER AS PARENT 1. IF THERE IS A MOTHER AND SHE HAS A MALE SPOUSE/PARTNER IN THE HOUSEHOLD, CODE THE SPOUSE/PARTNER AS PARENT 2 (IDP2). IF THERE IS NO SPOUSE/PARTNER IN THE HOUSEHOLD, PARENT 2 IS CODED AS NOT APPLICABLE.
- 3) IF THERE IS ONLY ONE FATHER (OF ANY TYPE) IN THE HOUSEHOLD AND NO MOTHER, CODE THE FATHER AS PARENT 1 (IDP1). IF THERE IS A FATHER AND HE HAS A FEMALE SPOUSE/PARTNER IN THE HOUSEHOLD, CODE THE SPOUSE/PARTNER AS PARENT 1 (IDP1) AND CODE THE FATHER AS PARENT 2 (IDP2). IF THERE IS NO SPOUSE/PARTNER IN THE HOUSEHOLD, PARENT 2 IS CODED AS NOT APPLICABLE.
- 4) IF THERE ARE TWO MOTHERS IN THE HOUSEHOLD, AN ORDER OF PREFERENCE WILL BE USED TO IDENTIFY ONE MOTHER TO BE PARENT 1 (IDP1), WITH THE ORDER SPECIFIED AS BIOLOGICAL, ADOPTIVE, STEP, FOSTER MOTHER OR FEMALE GUARDIAN, THEN OTHER FEMALE PARENT OR GUARDIAN. THE OTHER MOTHER IS IDENTIFIED AS PARENT 2 (IDP2). IF THERE ARE TWO MOTHERS OF THE SAME TYPE (E.G., TWO ADOPTIVE MOTHERS), THE MOTHER WITH THE LOWEST PERSON NUMBER IN THE HOUSEHOLD ROSTER IS IDENTIFIED AS PARENT 1 (IDP1) AND THE OTHER MOTHER IS IDENTIFIED AS PARENT 2 (IDP2).

HELP TEXT:

Learning disability involves problems with one or more of the basic processes used in understanding or in using language (spoken or written), listening, thinking, reading, writing, spelling, or solving problems in math. This may be referred to as a reading disability or math disability. In some cases a child with a learning disability can perform at grade level with special help.

Reading disability is a learning disability that affects a child’s ability to read and often also affects his or her writing.

Math disability Math disability is a learning disability that affects the child’s ability to understand and solve math problems.

Attention Deficit Disorder (ADD)/Attention Deficit Hyperactivity Disorder (ADHD): ADD and ADHD are health impairments that make it hard for a child to focus and pay attention. With ADHD, a child is also often hyperactive (always on the go) and may have trouble being patient. A child may act without thinking, and struggle to sit still (more than is appropriate for his or her age).

Autism Spectrum Disorder (ASD) or autism: ASD or autism affects a child’s ability to communicate (verbally and nonverbally) and interact socially. A child with autism has difficulty understanding emotions and the perspective of others. The characteristics may include a lack of responsiveness to other people, facial expressions that do not seem appropriate for the situation, responding in other socially inappropriate ways, and repetitive activities and movements (such as hand-flapping or rocking). A child with autism may show resistance to change and hypersensitivity to sensory experiences such as the texture of some clothes for example. A child with autism may be advanced or gifted in one or more areas. Autism Spectrum Disorder (ASD) includes children with Asperger’s syndrome and pervasive developmental disorder (PDD).

Speech or language impairment refers to a communication disorder. A child with a speech disorder may have voice disorders, stutter, or have problems distinguishing sounds. Speech disorders range from difficulty with using a particular sound (for example, the “th” sound in this) to difficulty with speaking loudly. A child with a language impairment may have difficulty understanding and forming sentences, using words correctly, finding words for what she or he wants to say, or his or her ability to repeat information just heard.

Intellectual disability (Severe cognitive disability): A child's mental development is noticeably behind what is expected for a child of his or her age. A child with an intellectual disability also has difficulty with performing some daily life activities or functions on his or her own. A child’s learning in school is very slow and far behind other children of that age. Previously called “mental retardation.”

Health impairment includes health issues that cause problems with strength, vitality, and alertness. A child with a health condition may function intellectually or cognitively as well as his or her peers, but have difficulty “keeping up” in general. Health impairments include problems such as epilepsy or other seizure disorder, asthma, diabetes, sickle cell anemia, or hemophilia.

Physical disability affects a child’s ability to move or balance. Disabling physical problems can include for example, cerebral palsy, amputations, bone tuberculosis, polio, and contractures (difficulty straightening a joint such as knees, elbows, and fingers).

Sensory impairments involve being hypersensitive (overly responsive) to touch, sound, movement, or temperature; or very under responsive to those sensory input. Sensory impairments may also involve a lack of

control over what sensory information to pay attention to. A child may have an increased alertness to very small changes in the environment making it difficult to maintain attention to what she or he is supposed to be learning.

Emotional Disturbance (ED) involves difficulty with emotions over a long period of time that hurts a child's school performance. ED may include (a) difficulty learning that cannot be explained by other factors; (b) difficulty with interpersonal relationships (i.e., getting along) with peers and teachers; (c) behavior or feelings that do not match what is happening; d) a general mood of unhappiness or depression; and/or (e) a tendency to develop physical symptoms or fears associated with personal or school problems. Emotional disturbance includes schizophrenia. It does not apply to a child who is socially maladjusted (extreme behavior problems), unless he or she also has an emotional disturbance.

Conduct disorder involves a pattern of behavior that is frequently defiant, angry, hostile, and disrespectful, and disrupts child's normal functioning. Before the age of ten, a child exhibiting these negative behaviors is usually diagnosed with oppositional defiant disorder. If behavioral symptoms after age ten are not severe, a child may also be diagnosed with oppositional defiant disorder.

Post Traumatic Stress Disorder, also known as PTSD, is a condition that some people develop after experiencing a shocking, terrifying, or dangerous event. PTSD can cause high anxiety, nightmares, flashbacks to the event, and can interfere with a child's ability to function.

Anxiety Disorders: A child who has an anxiety disorder worries much more than other children and may worry all the time. She or he may worry about nothing in particular or themselves, other's safety, her or his health, and/or the world. She or he often has physical signs of anxiety such as headache, abdominal pain, cramps, diarrhea, vomiting, and dizziness. Anxiety disorders include generalized anxiety disorder, social anxiety disorder (also called social phobia), and other specific phobias that interfere with a child's ability to function.

Obsessive Compulsive Disorder: A child must have obsessions or compulsions or both to have this disorder, and these obsessions and/or compulsions must be disabling to the child. Obsessions are thoughts that occur over and over and cause distress. A child spends so much time on the thoughts that she or he has a hard time taking care of herself or himself or relating to others. Compulsions are acts that a child feels driven to repeat over and over, such as a need to clean or organize excessively, to keep everything the same.

Eating disorders may involve eating too little and an obsession with staying thin (anorexia) or binge eating (gorging food). A child may make his or herself throw-up (vomit) after binge eating and/or taking laxatives (bulimia) or a child may vomit without trying after overeating.

Depression is a general or pervasive mood of sadness or unhappiness. It includes feeling helpless, hopeless, and worthless. Depression lasts for many days to weeks keeping a child from functioning normally.

Bipolar Disorder (also known as manic depressive disorder or manic depression) causes unusual swings in mood, energy, and activity levels in a child. This disability can make it difficult to carry out day-to-day tasks and can lead to poor decisions. The intense emotional swings are often unrelated to life events.

Tourette's syndrome is a nervous system disorder that involves movements or vocalizations that are repetitive and involuntary (not under the control of the child). These involuntary movements and vocalizations are called tics. Some examples include repeated facial grimaces, eye blinking, throat clearing, or grunting. Tics often get worse if a child is excited or anxious. Early symptoms are often first noticed between 3 and 9 years of age.

Traumatic Brain Injury (TBI) is an injury to the brain from an impact to the head such as a bad fall or a car accident. A TBI makes it hard for a child to learn and may affect day to day functioning. TBI applies to open or closed head injuries that lead to difficulties in one or more areas, such as understanding; memory; attention; reasoning; abstract thinking; judgment; problem-solving; language; sensory, perceptual, and motor abilities; social behavior; physical functions; information processing; and speech. The term does not apply to brain injuries that are there or that occur at birth, or that grow worse over time.
