**B. DESCRIPTION**

This data file contains 17,068 records, one for each public elementary and secondary education agency in the 50 States, District of Columbia, and 5 outlying areas, as reported to the National Center for Education Statistics by the State education agencies. Each record should contain State and federal ID's, name, address and telephone number of the agency, county name and FIPS code, agency type code, student counts, graduates and other completers counts, and other codes for selected characteristics of the agency. In addition, grade span, number of schools operated by the agency, and number of classroom teachers were aggregated from the CCD Public School Universe.

Comments for Users of Data Tape

1. Telephone numbers are not available for the following States:

Colorado, Maine, Michigan, and Montana

2. The data provided by Montana did not separate STUDENT COUNTS into the two categories requested. Therefore, the value in the PK THRU 12 student count field for Montana includes Ungraded students.

3. The Center ceased collecting grade span of the agency and number of schools operated by the agency with this year's report. However, since these are often useful information concerning school districts and other agencies, similar data, as well as total classroom teachers, were derived from the individual school records on the Public School Universe file.

- a. For number of schools and total classroom teachers, the data represents the total number of school records associated with each agency record and the sum of the classroom teachers reported for each of those school records. This is not necessarily the total number of teachers assigned to the agency, since not all teachers are assigned to a school. The following States did not report classroom teachers on the Public School Universe and therefore are missing that item on this file :

Massachusetts, Michigan, Mississippi, Rhode Island, and Wyoming

- b. The grade span was derived by first summing the enrollment by grade for all schools associated with each agency. Then, the lowest grade and highest grade with any student count were determined.
