The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high-quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

I. Introduction to the NCES Common Core of Data School District Finance Survey (F-33), School Year 2008–09 (Fiscal Year 2009) Final File Version 1a

This documentation is for the final file (Version 1a) of the National Center for Education Statistics' (NCES) Common Core of Data (CCD) School District Finance Survey (F-33) for school year 2008–09, fiscal year 2009 (FY 09). It contains a brief description of the data collection along with information required to understand and access the data file. The F-33 consists of data submitted annually to the NCES by state education agencies (SEAs) in the 50 states and the District of Columbia. The survey provides finance data for all local education agencies (LEAs) that provide free public elementary and secondary education in the United States. The F-33 data file does not include national and state totals.¹

NCES and the Governments Division of the U.S. Census Bureau collaborate to collect public school system finance data. The U.S. Census Bureau conducts a Census of Government Finances and an Annual Survey of Government Finances as authorized by title 13 U.S.C. §161 and 182. Congress authorizes NCES to collect these data through the Education Sciences Reform Act of 2002, section 151(b) (3), 20 U.S.C. 9541. The Census Bureau acts as the primary collection agent and produces two data files: one for distribution and reporting by the Census Bureau and the other for distribution and reporting by NCES. The Census Bureau refers to this data collection as the Survey of Local Governments: School Systems, and NCES refers to this data collection as the CCD School District Finance Survey (F-33). Specific differences between the collections include:

- ***Inclusion of independent charter school districts***—NCES requests that states report fiscal data in the F-33 for all independent charter school districts and all districts that include charter schools. Most states comply with this request. In contrast the Census Bureau data file and report includes only districts that meet the definition of an established government entity.²
- ***State payments on behalf of school districts***—NCES files include state government expenditures for and on behalf of school districts for all data items. In contrast, the Census Bureau aggregates these expenditures to total expenditures, current expenditures, total instructional expenditures, total support services, salaries across all functions, enterprise operations and benefits, total capital outlay, construction, land and buildings.
- ***Classification of state and local revenues***—The NCES file classifies revenues as being from local or state sources, as identified by each state submitting data. Some revenues which NCES categorizes as state are categorized as local by the Census Bureau.

¹ Refer to the CCD National Public Education Financial Survey (NPEFS) for national and state-level figures. The NPEFS, a key component of the CCD survey system, collects state totals of school finance data. Although both the NPEFS and the F-33 collect data from SEAs, the NPEFS includes expenditures for special state-run and federal-run schools that are not included in the F-33. NPEFS data represent the total spending on public elementary and secondary education for states and the nation, and are used in determining state funding allocations for a number of federal education programs, including those authorized by Title I of the Elementary and Secondary Education Act of 1965.

² U.S. Census Bureau, *Public Education Finances: 2009*, G09-ASPEF, U.S. Government Printing Office, Washington, DC, 2011.

SEAs appoint state fiscal coordinators to work with NCES and Census to provide accurate and comparable data across states and jurisdictions. NCES and Census provide annual training to state fiscal coordinators to ensure that variable definitions are well communicated and that states understand how to report accurate and timely fiscal data for their state or jurisdiction.

The CCD is a national statistical database of information that describes all public elementary and secondary schools and school districts. The CCD consists of six annual surveys: the Public Elementary/Secondary School Universe Survey, the Local Education Agency Universe Survey, the State Nonfiscal Survey of Public Elementary/Secondary Education, the National Public Education Financial Survey (NPEFS), the School District Finance Survey (F-33), and the Teacher Compensation Survey (TCS). The CCD files include regular school districts, independent charter school districts, as well as a substantial number of records representing administrative and operating units that are unlike typical public schools and school districts. The CCD system provides features that enable SEAs and data users to identify and select records according to the categories of interest to them. The principal users of CCD fiscal data are the federal government, the education research community, state and local government officials (including school boards and LEA administrators), and the general public.

The NCES accounting handbook, *Financial Accounting for Local and State School Systems: 2009 Edition* (Allison, Honegger, and Johnson 2009), provides a set of standards and guidance for school system accounting. The handbook gives common definitions for detailed account classifications, which are aggregated to form the data items collected in the F-33 survey. The use of the accounting handbook by SEAs facilitates the comparability of data across states and school districts.

The population universe changes from year to year. Districts may be newly incorporated, undergo boundary changes, consolidate, disaggregate, or dissolve. The nonfiscal CCD Local Education Agency Universe Survey files and documentation located at <http://nces.ed.gov/ccd/pubagency.asp> present more detailed information on these changes.

The data file for the FY 09 CCD School District Finance Survey (F-33) contains 16,563 records representing the public elementary and secondary education agencies in the 50 states and the District of Columbia. The F-33 file includes variables for revenues by source, expenditures by function, indebtedness, assets, student membership counts, as well as identification variables. For a complete list of variables, see appendix A. Finance data are presented in whole dollar amounts.

The remainder of this documentation includes a user's guide and five appendixes. The user's guide contains information on the methodology of this survey, including certain conditions that are unique to the data file for the FY 09 survey cycle and information about changes to the survey that may be important to the user planning longitudinal analyses.

The five appendixes are as follows:

- **Appendix A—Record Layout and Descriptions of Data Items** gives the variable names and labels of the data items discussed throughout the documentation, as well as their location in the data file for the FY 09 survey cycle.
- **Appendix B—Glossary** defines terms and variables used in the F-33.
- **Appendix C—State Notes** provides comments related to unique state financial practices for FY 09 and how those practices relate to this data release.

- **Appendix D—Value Distribution and Field Frequencies** provides the frequency and distribution of data items across local education agencies.
- **Appendix E—Survey Form** includes a facsimile of the data collection instrument.

II. User’s Guide

A. Methodology

The F-33 collects finance data from the universe of LEAs from each of the 50 states and the District of Columbia. Between October 1 and December 31 of each year, the Census Bureau distributes the F-33 survey instrument to all SEAs. Representatives from each SEA collect and edit data from their LEAs and submit data to the Census Bureau usually between March 15 and October 30 of the following year. The FY 09 F-33 collection opened on February 16, 2010 and closed on January 21, 2011. States report data to the Census Bureau in either the F-33 format or in the individual state agency’s format. When SEAs report in their state agency format, the Census Bureau staff manually evaluates the SEA’s chart of accounts and creates a “crosswalk” that edits state data to the F-33 format.

For the FY 09 collection, the following states submitted data in their own formats: Alabama, Arizona, California, Indiana, Kentucky, Louisiana, Maine, Massachusetts, Mississippi, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Oregon, South Carolina, Tennessee, and Utah. Idaho and Oklahoma sent revenue data in the F-33 format and expenditure data in their own state format. All other states reported data in the F-33 format. Survey analysts monitor all data by 1) comparing the school district finance data to other CCD survey data and 2) performing internal and longitudinal consistency checks.

The F-33 is designed to provide finance data for each school district. The sum of school district data from F-33 to state totals may differ from state finance data provided from NPEFS, which collects total revenues and expenditures for public education at the state level. This is because NPEFS includes expenditures for schools and programs operated by the states and federal government that are not reported at the school district level.

B. Accounting and Collection Methods

The F-33 survey intends to provide a comprehensive picture of the financial activity associated with public elementary and secondary school systems. The F-33 data include all financial transactions associated with assets, expenditures by object and function, indebtedness, and revenues by source.

The Census Bureau performs the data collection and reviews the data. The Census Bureau and NCES work with CCD state fiscal coordinators to resolve any inconsistent or unusual data. The Census Bureau may edit data from supplemental information in the event that the LEA data do not strictly adhere to the reporting guidelines of the NCES accounting handbook. Census also imputes data items that are missing. Imputations provide a plausible substitution for cases where data are not reported or erroneous. Appendix C—State Notes provides a general record of data anomalies associated with state reporting and adaptations for the F-33.

There are some instances where the Census Bureau and NCES differ in their classification of tax items. For example, the variable NCES Local Revenue/Census Bureau State Revenue (C24)³ records items classified as local revenue by NCES, but as state revenue by the Census Bureau.

Fiscal Years

The fiscal year begins on July 1 and ends on June 30 for most states. The fiscal year for Alabama runs from October 1 through September 30, and the fiscal year for Nebraska and Texas runs from September 1 through August 31. CCD survey personnel do not edit F-33 data to conform to a uniform fiscal year.

Transfer Items

The F-33 file contains several items involving the transfer of funds among school districts. Local Revenues From Other School Systems (D11) consist of payments received from other school districts for providing services. Payments to Other School Systems (Q11) are expenditures made to other school districts for providing services. The summary revenue (TLOCREV and TOTALREV) and expenditure (TOTALEXP) items for each district include these items. Data users should refer to the NPEFS for state and national totals; compiling state and national totals from the F-33 survey data would result in double counting, due to the inclusion of the D11 and Q11 transfer items.

Other transfer items include Local Revenues From Cities and Counties (D23) and the expenditure items Payments to State Governments (L12) and Payments to Local Governments (M12). D23 revenue is included in TLOCREV and TOTALREV. L12 and M12 expenditures are included in TOTALEXP.

Special Exhibit Items

Special exhibit items are separate data items that are included in, but do not summarize to, other data items.

- Expenditures for teacher salaries are defined as base salaries paid to certified teachers and certified substitute teachers. Expenditures for teacher salaries are reported in four program areas: Regular (Z35), Special (Z36), Vocational (Z37), and Other (Z38). The broader instructional salaries (Z33) include both data expenditures for teacher salaries by program area and salaries for instructional assistants and aides. Textbook expenditures for instructional purposes (V93) are also reported as an exhibit item.
- Payments to Private Schools (V91) and Payments to Charter Schools (V92) are special exhibit items used to identify charter school and private school expenditures. The Payments to Private Schools (V91) and Payments to Charter Schools (V92) do not represent total charter school and private school expenditures. Prior to FY 09, V91 and V92 expenditures were included in Current Expenditures—Instruction (E13 and TCURINST), Total Current Expenditure for Elementary/Secondary Education

³ Variable names are included in parentheses following variable labels at first reference. Subsequent references use variable names only.

(TCURELSC), and TOTALEXP. Beginning with FY 09, E13, TCURINST, TCURELSC, and TOTALEXP do not include V91 and V92.

- State Payments on Behalf of the Local Education Agency—Employee Benefits (C38) and State Payments on Behalf of the Local Education Agency—Other than Employee Benefits (C39) are included in the state revenue subtotal (TSTREV) and total revenue (TOTALREV). State direct support expenditures for and on behalf of school districts are included in the detailed current expenditure items. State payments on behalf of the LEA are not reported separately in the file, but are included in the detailed data items, as shown in table 1.

American Recovery and Reinvestment Act (ARRA) Data

In February of 2009, Congress passed the American Recovery and Reinvestment Act of 2009 (ARRA). The Department of Education allocated funds to the states under this legislation.⁴ As a result of the ARRA, NCES added three data items to the F-33 in order to collect and analyze data

⁴ http://www.recovery.gov/About/Pages/The_Act.aspx; accessed June 6, 2011.

pertaining to Title I, Impact Aid, and other ED funds. The three additional data items provide the necessary detail to report total ARRA expenditures, Title I revenues, and their functional allocations, such as for classroom instruction or school construction. The three additional items are:

- ARRA Revenues—Title I (HR1);
- Current Expenditures—ARRA (HE1); and
- Capital Outlay—ARRA (HE2).

The F-33 is collecting ARRA data in the F-33 collection for FY 09, FY 10, and FY 11.

Data Item Flags

Beginning with FY 99, the F-33 data file contains a flag for each data item (except summary items, such as TOTALREV, TLOCREV, and TOTALEXP). The flag identifies whether the item was reported by the state, edited or imputed by CCD survey staff, or was not applicable to that district. These companion flags can be found at the end of the data file and are identified by the name of the original data item preceded by an “FL_” (e.g., FL_E13 or FL_19H).

The flags are as follows:

- R—As reported by the state;
- A—Edited by the analyst or imputed (formerly labeled “Adjusted”);
- S—Edited to include data for state payments made on behalf of the school systems; and
- N—Not applicable.

Missing, Nonapplicable, and Suppressed Data

In the F-33 data files CCD identifies missing data by reporting the data value as “-1.” Because all fiscal data items on the FY 2009 F-33 data file (including student membership) have been either imputed or edited, there are no fiscal data variables on the file with missing data. Sometimes it is difficult to distinguish a reported zero from a state respondent represents a missing data item or a true zero. For example, small districts often have staff and other costs that cross functions. The principal of a school in a one-school LEA may also serve as the LEA superintendent. In some cases, the state might report this person’s salary under LEA administration instead of allocating the salary to both LEA administration and school administration functions. In this scenario, the zero data reported for school administration would be assigned a flag of “R.”

The original source for the student membership count (V33) in the FY 09 F-33 data file is the CCD nonfiscal 2008–09 LEA Universe Survey. Census and NCES may edit student membership counts from the CCD Local Education Agency Universe Survey if the state reports revised membership information for F-33. States generally report the nonfiscal membership information for the LEA Universe Survey in the spring of the school year. The timing of the F-33 collection is about one year after the nonfiscal LEA collection. Even though the membership data have the same reference date and definition, V33 values may not match student membership values from the CCD Local Education Agency Universe Survey for some LEAs. In the F-33 data files CCD identifies suppressed data by reporting the data value as “-3” and the data item flag as a value of “A.” NCES suppresses V33 values in cases where the student count in the CCD Local Education Agency Universe Survey does not reflect the number of students educated in the district. For

example, special education districts and vocational districts may have suppressed membership values if these districts provided instruction or support services for students not counted in the CCD Local Education Agency Universe.

In the F-33 data files CCD identifies non-applicable data by reporting the data value as “-2” and the data item flag as a value of “N.” Non-applicable data are cases where a district does not have a particular type of revenue or expenditure. For example, for fiscally independent districts, the value for Local Revenues—Parent Government Contributions (T02) is “-2,” and the Local Revenues—Parent Government Contributions Flag (FL_T02) is assigned a value of “N.”

Nonsampling Error

Nonsampling error is the error in an estimate arising at any stage in the survey from sources exclusive of sampling error. Nonsampling error includes coverage errors, nonresponse error; data processing or data entry errors, or reporting error because respondents misinterpret survey questions or do not follow survey instructions or do not follow the item definitions correctly. State education policies may differ in such a way that does not allow them to map their data exactly to the CCD definitions. For example, one state may report revenues from student activities while another may not report these revenues because the state prohibits districts from collecting such revenues. Another source of nonsampling error may be variations in the reference period for the reported data. For example, CCD requests student membership data for October 1 of each school year, but a state may report their information for another date because they were not able to capture the data for October 1.

The F-33 universe includes all public school districts in the 50 states and the District of Columbia. All 51 state-level respondents reported data for FY 09. Charter school systems’ reporting requirements vary from state to state. As a result, SEAs do not report finance data for charter schools uniformly. Some independent charter schools do not submit finance data to SEAs, and, as a result, fiscal data for these schools may be missing from the F-33 file.

Reference Sources for Data Definitions

Four reference sources are used in conjunction with F-33 variable description and state reporting.

- *Financial Accounting for Local and State School Systems: 2009 Edition* (Allison, Honegger, and Johnson 2009) can be accessed online at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2009325>. This publication contains standard account codes, classification criteria, and definitions for reporting school system financial information, providing a system by which fiscal data can be reported in a comprehensive and uniform manner.
- *Governmental Accounting, Auditing, and Financial Reporting* (Gauthier 2005) can be purchased from the Government Finance Officers Association.
- *Government Finance and Employment Classification Manual* (U.S. Census Bureau 2006) can be accessed online at <http://www.census.gov/govs/www/class06.html>.
- F-33 Survey Form “Basic Instructions and Suggestions” includes a summary of definitions needed to respond to the survey (see the survey form in appendix E).

C. Unit Identifiers

Six variables serve as the primary identification variables for each LEA on this file:

- NCES local education agency identification code (LEAID);
- Census Bureau identification code (CENSUSID);
- American National Standards Institute (ANSI)⁵ state code (FIPST);
- ANSI county number (CONUM);
- Consolidated Statistical Area code (CSA); and
- Core-Based Statistical Area code (CBSA).⁶

C.1. Identification Variables

LEAID

The NCES local education agency identification code (LEAID) is the most frequently used identifier within this data release. LEAID codes allow users to match LEA finance data with data from the nonfiscal CCD surveys (e.g., the Local Education Agency Universe Survey and the Public Elementary/Secondary School Universe Survey, which contain data on students, staff, dropouts, and graduates). The LEAID code has seven characters: a two-digit state code followed by a five-digit number that is unique to each agency within the state. This identifier generally remains the same across the years of data collection.

LEAID Matching Issues

Sometimes SEAs report agencies to the F-33 that cannot be matched to the nonfiscal LEA universe file. The result is that the agency may not have a valid LEAID. If F-33 survey staff cannot find a matching LEA on the nonfiscal universe file for the corresponding school year, they attempt to match the LEA to the nonfiscal universe files for the prior and subsequent school years. In the case a match occurs, F-33 will use the LEAID from the prior or subsequent year nonfiscal universe.

The existence of a valid LEAID code does not guarantee that a match can be made with the current year LEA universe file. For example, a closed LEA on the nonfiscal file will appear on the nonfiscal file as closed for the year it closes only. In the subsequent school year, the SEA may not report the LEA on the nonfiscal universe file but could report fiscal data on the F-33 file.

It is also possible for a district to receive start-up money in advance of having students and staff. Although NCES requests that states report “future” districts are on the nonfiscal LEA universe,

⁵ American National Standards Institute (ANSI) state codes replace the Federal Information Processing Standards (FIPS) codes previously issued by the National Institute of Standards and Technology (NIST) for the 50 states, the District of Columbia, and the U.S. Island Areas. ANSI state code values map directly to the retired FIPS code values.

⁶ In addition to these variables, there are six other unit characterization codes: the school-level code (SCHLEV), the agency charter code (AGCHRT), the CCD Agency Nonfiscal File Match (CCDNF), the Census Bureau Fiscal File Match (CENFILE), Agency Low Grade Offered (GSLO), and Agency High Grade Offered (GSHI).

not all states are able to report districts until they become operational. This results in some future districts being reported in the F-33 survey but not in the LEA universe survey.

Starting in FY 06, the Census Bureau assigned unique dummy LEAIDs to the LEAs without a valid LEAID. There are 29 dummy LEAIDs on the FY 09 file. Dummy LEAIDs can be recognized by having “D” in the third position of the LEAID. Dummy LEAIDs will remain the same across the years of data collection, unless a matching LEA universe is found in a subsequent year.

The CCD Agency Nonfiscal File Match flag (CCDNF) indicates whether a record in the F-33 file matches a record in the LEA universe file. NCES matches every LEA there is F-33 data for, regardless of membership, even if it is 0. However in the F-33 First Look reports, only the LEAs that match to the current year nonfiscal LEA file and have a membership greater than zero in the F-33 file are included. In most NCES research and publications, only those F-33 records matching the LEA universe file and having student counts greater than zero are used in analyses. For more information on the LEAID code, please see the file documentation for the CCD school universe and LEA universe surveys, available at <http://nces.ed.gov/ccd/pubagency.asp>.

CENSUSID

The Census Bureau identification code (CENSUSID) consists of the following items by their position in a 14-character field:

- 1–2 = Census Bureau state code;
- 3 = Agency type code;
- 4–6 = County area code;

NOTE: CENSUSID is the Census Bureau identification code.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "School District Finance Survey (F-33)," fiscal year 2009, Version 1a.

Position 3 of CENSUSID represents the district's type of school government. It indicates whether a district is fiscally independent and, if not, what level of government controls its revenue-raising authority. This characteristic has not remained constant over all survey cycles. For an explanation of CENSUSID changes, see prior file documentation (Berry and Cohen 2005). The agency type codes are as follows:

- 0 = State government school system;
- 1 = County-dependent school system;
- 2 = City-dependent school system;
- 3 = Township-dependent school system; and
- 5 = Independent school system.

Positions 4–6 of CENSUSID represent the county area code. County area codes generally reflect alphabetically ordered numbering of counties for each state. Positions 7–9 uniquely identify a government unit, regardless of type. After the FY 93 survey cycle, the Census Bureau added unique identifiers (positions 10 through 14) to further specify subunits of parent governments.

For some districts, CENSUSID may change across survey cycles due to boundary changes or changes in governmental control.

Geographic Variables

Four variables in the F-33 file allow records to be identified with specific geographic areas:

- **FIPST** is the ANSI state code. Table 3 presents ANSI state codes by state name and state abbreviation.
- **CONUM** is the ANSI county number. It consists of the two-digit ANSI state code and a three-digit county identification number. County numbers for each state can be found at <http://www.census.gov/geo/www/ansi/countylookup.html>.
- **CBSA** is the Core-Based Statistical Area code. CBSA refers collectively to metropolitan and micropolitan statistical areas. Each metropolitan statistical area must have at least one urbanized area of 50,000 or more inhabitants. Each micropolitan statistical area must have at least one urban cluster of at least 10,000 but less than 50,000 population.⁷
- **CSA** is the Combined Statistical Area code. A CSA consists of two or more adjacent CBSAs.

⁷ For information about CBSA and CSA definitions, see http://www.census.gov/geo/www/2010census/gtc/gtc_cbsa.html.

C. 2 Other Unit Characterization Codes

School-level Codes

School-level codes (SCHLEV) describe the level of education provided within each school district:⁸ SCHLEV codes “01,” “02,” and “03” are assigned based on the student membership reported on the CCD school universe file. The valid F-33 SCHLEV codes are defined as follows:

- 01 = Elementary school system only—the lowest grade with students is less than grade 9 and the highest grade with students is less than grade 9;

⁸ Starting with FY 08, the assignment of SCHLEV codes for an LEA was changed to a new method to ensure that SCHLEV codes were consistent with student enrollments by grade. Prior to FY 08, the Census Bureau assigned SCHLEV codes using a different methodology. SCHLEV has a different definition on the nonfiscal LEA universe file than on the F-33 file.

- 02 = Secondary school system only—the lowest grade with students is greater than grade 6 and the highest grade with students is greater than grade 8;
- 03 = Elementary/Secondary school system—the lowest grade with students is less than grade 7 and the highest grade with students is greater than grade 8;
- 05 = Vocational or special education system;
- 06 = Nonoperating school system that exists for administrative purposes only and does not operate its own schools. SCHLEV code “06” is assigned for LEAs that closed shortly before the start of the fiscal year or are scheduled to open in a future fiscal year but still reported revenue or expenditure information for the current fiscal year; and
- 07 = Education service agency (ESA).

The ESAs are coded as “07” regardless of whether or not they provide general, special, or vocational education services. Special, vocational, and alternative education schools are identified in the CCD school universe file, which can be linked to the F-33 file to determine the type of services an agency provides.

AGCHRT Codes

Charter schools are public schools that are exempted from significant state or local rules that normally govern the operation and management of public schools. A developer creates a charter school as a public school or a charter school is adapted from an existing public school. A charter school provides a program of elementary or secondary education, or both and operates in pursuit of a specific set of education objectives determined by the school’s developer and agreed to by the public chartering agency. Charter schools are subject to all applicable federal, state, and local health and safety requirements; federal civil rights laws; and are subject to all applicable state laws and regulations. Charter schools may be operated by a regular school district, a university, or a private organization or they may be self-governing entities. CCD nonfiscal standards require all schools, including charter schools, to be associated with a school district. In cases where a charter school is not associated with a reported school district, NCES creates a separate school district record.

The AGCHRT code is used to identify districts with charter schools. The codes are as follows:

- 1 = All associated schools are charter schools;
- 2 = All associated schools are charter and noncharter schools;
- 3 = All associated schools are noncharter schools; and
- N = Not applicable or code could not be determined (assigned to school systems in the F-33 file, such as ESAs, that do not operate schools, as well as to districts that are not in the CCD nonfiscal files).

CCDNF

The CCDNF variable indicates whether a record in the F-33 file matches a record in the LEA universe file: “0” indicates that the record does not match; “1” indicates that the record does match.

CENFILE

The CENFILE variable identifies records in the F-33 data file released by NCES that are not found in the Census Bureau's version of the data file. All school districts in the Census Bureau release must meet the criteria for being a government entity or a dependent agency of a government entity. In certain cases, districts provide public education, but do not meet these criteria. As a result, CCD files include independent charter school districts that are not included in the Census Bureau data file. A CENFILE value of "0" identifies districts that are not in the Census Bureau file; a value of "1" identifies those that are in the Census Bureau file.

GSLO and GSHI

Agency Low Grade Offered (GSLO) and Agency High Grade Offered (GSHI) comprise the grade span for the LEA. The GSLO variable indicates the lowest grade offered; the GSHI variable indicates the highest grade offered.

D. Weights

The F-33 file includes a WEIGHT variable. For FY 91, FY 93, and FY 94 the F-33 was a sample survey, and the WEIGHT is used to create weighted estimates for these data releases. For FY 90, FY 92, and FY 95 through FY 09 the F-33 was a universe survey, and all records in these releases have a WEIGHT value of "1." Despite F-33 being a universe survey in recent years, NCES maintains the WEIGHT variable to provide consistency across data files.

E. Changes to the F-33 Survey

Several changes to the F-33, including a major expansion of the survey form beginning with the FY 92 collection, have been implemented over the life cycle of the survey. Data users interested in conducting longitudinal analysis should consult prior F-33 file documentation (Berry and Cohen 2005) for a summary of historical changes. The most recent changes to the survey are summarized below. File documentation from previous years can be found at <http://nces.ed.gov/ccd/f33agency.asp>.

Unit Identifiers

Starting with FY 98, two variables that describe the nature of school districts and their relation to other surveys and data files were added: AGCHRT and CENFILE.

- AGCHRT identifies school districts with charter schools.
- CENFILE identifies those districts that are available in the U.S. Census Bureau's version of the F-33 school district file.

Starting with FY 06, dummy LEAIDs were assigned to agencies where a valid LEAID code was not available. The dummy LEAIDs can be recognized by having "D" in the third position of the LEAID. Dummy LEAIDs will remain the same across the years of data collection (see section C.1.).

Prior to FY 09, an LEA could have its name spelled differently in the F-33 file and in the CCD LEA Universe file (e.g., for the LEA with LEAID "0100005," the name in the F-33 file was "Albertville City School District" and the name in the CCD LEA Universe file was "Albertville

City”). Starting with FY 09, the name of an LEA in CCD LEA Universe file was used as the name of the LEA in the F-33 file.

Special Exhibit Items

Teacher salary and textbook exhibit items were added to the survey form since the FY 04 collection. These items are described in section II. B and in the glossary (see appendix B).

Federal Revenue Distributed by State Governments

In the FY 05 survey, the data item Federal Revenue—Bilingual Education (B11) was moved from the “federal revenue direct” section to the “federal revenue through the state” section. The change was made as a result of changes in the allocation of Bilingual Education funds by the U.S. Department of Education.

Suppressed Data

Starting in FY 06, NCES suppressed Membership (V33) in cases where the student count in the CCD Local Education Agency Universe Survey did not reflect the number of students educated in the district. A value of “-3” was used in the data file to represent values suppressed by NCES (see section II. B).

Local Revenue Items

Four local revenue items were added to the survey form since the FY 06 collection. They are Local Revenue—Rents and Royalties (A40), Local Revenue—Sale of Property (U11), Local Revenue—Fines and Forfeits (U30), and Local Revenue—Private Contributions (U50).

Missing Data

Starting in FY 07, “-1” was used in the data file to represent missing values in student membership count (V33). However, the 2008–09 does not contain any missing values.

Payments to Private Schools and Charter Schools

Starting with FY 09, the payments to private schools and charter schools (V91 and V92) were excluded from E13, TCURINST, TCURELSC, and TOTALEXP.

F. Data File Formats, Names, and Versions

File Formats

Data are available in two formats—SAS datasets (.sas7bdat) and tab-separated values text files (.txt).

File Names

The names of the FY 09 releases are as follows:

- Sdf091a.sas7bdat (SAS dataset)
- Sdf091a.txt (text file)

The first five characters indicate the file contents and year, and the last two characters indicate the file version. “Sdf” stands for school district finance, “09” stands for FY 09, “1” indicates that the file is a final version by NCES, and “a” indicates this is the first version of this file by NCES.

File Versions

Starting in school year 1999–2000, CCD data file names include a two-digit version number. The final files are assigned a version number beginning with 1 (one). The character following 1 indicates the version number of the file (e.g., a “1a” file is the first (original) final file, and a “1b” file is the second (revised) final file).

NCES releases a final file (Version 1a) after a publication using the data has been released. (NCES standards require that an NCES publication using the data be released before the data are considered final.) If NCES receives revised data from states or discovers errors in the final data file, a revised file (Version 1b) is released. The documentation for the revised file indicates which states submitted revised data. The revised file is usually released one year after the original (Version 1a) final file.

Guidelines for Using the Flat ASCII Data File

When using the flat ASCII data file, care should be taken to label the identification number variables (e.g., the ANSI state code) as character fields. This is necessary in order to retain the leading zero in many of the identification numbers. It is necessary to keep the leading zeroes when merging these data with other files. This can be accomplished in Excel by using the “Import Wizard” to select the ID fields and set them as text fields.

G State Notes

Appendix C—State Notes contains information from SEA respondents regarding any significant changes in the data they are reporting and the beginning and end dates of the fiscal year. This documentation reports these comments as stated by the respondent with minimal editing by NCES.

H. Survey Form

The F-33 survey form contains items that do not appear in the data file. They are referred to as “Special Processing Items” and are used in processing the F-33 data. These items are listed in Part IX of the survey form and include T07, J13, J17, J07, J08, J09, J40, J45, J90, J10, J12, J11, B23, J14, J95, J96, J97, J98, and J99. Appendix E provides this form, which can be viewed and printed using Acrobat Reader.

capital outlay: Direct expenditure for construction of buildings, roads, and other improvements, and for purchases of equipment, land, and existing structures. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for repairs to such works and structures is classified as current expenditure. [TCAPOUT is the sum of F12, G15, K09, K10, and K11]

It meets all applicable federal, state, and local health and safety requirements; complies with federal civil rights laws; and operates in accordance with state law. Charter schools may be operated by a regular school district or they may be self-governing entities. [AGCHRT]

Appendix C—State Notes

The following notes describe known anomalies in state data reported to the collection agent. Each anomaly recorded here applies to the current fiscal year. The absence of “Notes” for a state indicates that the state’s data did not contain any anomalies.

Alabama

Fiscal Year: October 1–September 30

Alaska

Fiscal Year: July 1–June 30

Notes:

- The state reported the State Payments on Behalf of the Local Education Agency data. The Census Bureau redistributed these data to the corresponding expenditure items for the state.
- The Alaska financial reporting system cannot isolate payments to other school systems (Q11). These amounts are usually small. They will slightly inflate the current expenditure amounts for individual school districts.

Arizona

Fiscal Year: July 1–June 30

Notes:

- The Arizona financial reporting system cannot isolate payments to other school systems (Q11). These amounts are usually small. They will slightly inflate the current expenditure amounts for individual school districts.
- The state reported capital outlay payments for land and existing structures (G15) under construction (F12).

Arkansas

Fiscal Year: July 1–June 30

Notes:

- The state reported the State Payments on Behalf of the Local Education Agency data. The Census Bureau redistributed these data to the corresponding expenditure items for the state.

Appendix C—State Notes

California

Fiscal Year: July 1–June 30

Notes:

- The state reported the State Payments on Behalf of the Local Education Agency data. The Census Bureau redistributed these data to the corresponding expenditure items for the state.
- For six districts in California, the state reports a single unified district in the F-33 survey, but separate elementary and secondary districts in the Common Core of Data (CCD) Local Education Agency Universe Survey. California treats the two elementary and high school districts as one district in its financial accounting, but as separate districts in managing its student and staff data. The LEAID of the combined district in the F-33 file is the same as the LEAID of the administrative office for the component elementary and high school districts in the CCD LEA Universe file, so the combined district in the F-33 file may be matched to the CCD LEA Universe file. Table C-1 lists the combined districts, LEAIDs, and enrollment.

Table C-1. California combined school districts in the F-33 file and the corresponding component districts in the Common Core of Data (CCD) Local Education Agency (LEA) Universe file: Fiscal year 2009

- As of FY 09, Vermont's state education fund directly funds union school districts. Prior to FY 09, union school districts were funded by their member school districts. This explains the significant decrease in revenues from other school systems (D11) in union school districts and significant decrease in payments to other school systems (Q11) in member school districts.
