Care Compare July Refresh of IRF QRP Data – Now Available

The July 2022 refresh of the Inpatient Rehabilitation Facility (IRF) Quality Reporting Program (QRP) data is now available on [Care Compare](#) and [Provider Data Catalog \(PDC\)](#).

The data are based on quality assessment data submitted by IRFs to Centers for Medicare & Medicaid Services (CMS) from **Quarter 4, 2020 through Quarter 3, 2021**. Additionally, the Centers for Disease Control and Prevention (CDC) measures reflect data from **Quarter 3, 2020 through Quarter 2, 2021** for the Clostridium Difficile Infection (CDI) and Catheter-Associated Urinary Tract Infections (CAUTI) measures, **as well as Quarter 4, 2018 through Quarter 1, 2019** for the Healthcare Personnel (HCP) Influenza measure. This refresh also resumes the reporting of all claims-based measures. Due to the COVID-19 reporting exceptions, the claims-based measures have been calculated excluding Q1 and Q2 2020 data. The data for the claims-based measures will display data from **Quarter 3, 2019 through Quarter 4, 2019** and **Quarter 3, 2020 through Quarter 2, 2021** for this refresh.

In summary, the following IRF QRP measures will be displayed on Care Compare and PDC during the July 2022 refresh:

- Application of Percent of Residents Experiencing One or More Falls with Major Injury (Long Stay) (NQF #0674)
 - Q4 2020 – Q3 2021 (10/1/2020 – 9/30/2021)

IRF Provider Preview Reports – Now Available

The Inpatient Rehabilitation Facility (IRF) Provider Preview Reports have been updated and are now available. These reports contain provider performance scores for quality measures, which will be published on [Care Compare](#) and [Provider Data Catalog \(PDC\)](#) during the **September 2022** release.

Please note that historically, in any given calendar year CMS performs the annual update to all IRF claims-based quality measures during the September refresh of the Care Compare/Provider Data Catalog sites. Because CMS only recently resumed public reporting of IRF claims-based measures during the June 2022 refresh, we will not be performing the normal annual update in September, as the data will not change enough to be meaningful. CMS will next update these IRF measures during the September 2023 update, after which we will resume our normal cadence of annual updates.

The data contained within the Preview Reports are based on quality assessment data submitted by IRFs from **Quarter 1, 2021 through Quarter 4, 2021**. Additionally, the Centers for Disease Control and Prevention (CDC) measures reflect data from **Quarter 4, 2020 through Quarter 3, 2021** for the Clostridium Difficile Infection (CDI) and Catheter-Associated Urinary Tract Infections (CAUTI) measures, **as well as Quarter 4, 2018 through Quarter 1, 2019** for the Healthcare Personnel (HCP) Influenza measure. The data for the claims-based measures will display data from **Quarter 3, 2019 through Quarter 4, 2019** and **Quarter 3, 2020 through Quarter 2, 2021** for this release.

Lastly, one new CDC measure (COVID-19 Vaccination Coverage among Healthcare Personnel (HCP)) will be publicly reported on Care Compare and PDC beginning with the September 2022 release and is reflected within the Preview Reports. The data for the COVID-19 Vaccination Coverage among HCP measure will display data submitted for **Quarter 4, 2021** for this release.

Providers have until **July 15, 2022** to review their performance data. Corrections to the underlying data will not be permitted during this time. However, providers can request Centers for Medicare & Medicaid Services (CMS) review of their data during the preview period if they believe the quality measure scores that are displayed within their Preview Reports are inaccurate.
