III. FUNDING:

For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

I. GENERAL INFORMATION

A. Background: The Health Insurance Portability and Accountability Act of 1996 (HIPAA) instructs health plans to be able to conduct standard electronic transactions adopted under HIPAA using valid standard codes. Medicare policy states that CARCs and RARCs, as appropriate, which provide either supplemental explanation for a monetary adjustment or policy information that generally applies to the monetary adjustment, are required in the remittance advice and coordination of benefits transactions.

The CMS instructs contractors to conduct updates based on the code update schedule that results in publication three times per year – around March 1, July 1, and November 1. This Recurring Update Notification (RUN) applies to Chapter 22, Sections 40.5, 60.1, and 60.2 of Pub. 100-04.

The CMS provides this CR as a code update notification indicating when updates to CARC and RARC lists are made available on the official Accredited Standards Committee (ASC) X12 website. The Shared System Maintainers (SSMs) have the responsibility to implement code deactivation, making sure that any deactivated code is not used in original business messages and allowing the deactivated code in derivative messages. The SSMs must make sure that Medicare does not report any deactivated code on or after the effective date for deactivation as posted on the official ASC X12 website. If any new or modified code has an effective date later than the implementation date specified in this CR, contractors must implement on the date specified on the official ASC X12 website.

A discrepancy between the dates may arise, as the official ASC X12 website is only updated three times per year and may not match the CMS release schedule. For this recurring CR, the MACs and the SSMs must get the complete list for both CARC and RARC from the official ASC X12 website to obtain the comprehensive lists for both code sets and determine the changes that are included on the code list since the last code update CR (CR12102).
