¹ Outlier services imputed payment amounts. Oral or other equivalent forms of Part B injectable drugs included in the ESRD PPS bundle (notwithstanding the delayed implementation of ESRD-related oral-only drugs effective 1/1/2025).

² The mean dispensing fee of the NDCs listed above is **\$0.58**. This amount will be applied to each NDC included fee on the monthly claim. We will limit 1 dispensing per NDC per month. Providers should report the quantity in the smallest available unit. This is necessary because Medicare is using the mean per unit cost in calculating the outlier. For example, if the provider reports NDC 00054312041 Calcitriol 1 mcg/ml oral solution (15/ml/bottle) reported and uses the full 15 ml bottle, the quantity is as 15, not 1. This allows for the most accurate calculation for the outlier.

¹Effective January 1, 2018, pricing methodologies available in section 1847A of the Act, as appropriate, are used to price drugs and biological products for the outlier calculation when ASP pricing data is not available (82 FR 50745).

²Average Sales Price (ASP) payment limits for Healthcare Common Procedure Coding System (HCPCS) codes in this chart are not published in the ASP Drug Pricing Files at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Part-B-Drugs/McrPartBDrugAvgSalesPrice/index.html>. ASP-based payment limits in this chart are updated quarterly based on data that is submitted to CMS by drug manufacturers. Payment limits for other renal dialysis service Part B drugs and biologicals appear in the ASP Drug Pricing Files, and with the exception of composite rate drugs and drugs reported with the AY modifier, are included in the outlier calculation.
