

## MS-DRG V38.0 ERRATA R1

Issue: Three ICD-10-PCS procedure codes grouping to the wrong MS-DRGs

Description: The ICD-10 MS-DRG Definitions Manual and Software v38.0 did not accurately reflect three procedure codes that were finalized for reassignment in MDC 4 from MS-DRGs 163, 164, and 165 (Major Chest Procedures with MCC, with CC and without CC/MCC, respectively) to MS-DRGs 166, 167, and 168 (Other Respiratory System procedures with MCC, with CC and without CC/MCC, respectively).

Resolution: The following three procedure codes were removed from MS-DRGs 163, 164, 165 (Major Chest Procedures with MCC, with CC and without CC/MCC, respectively) and are appropriately reflected in the logic for MS-DRGs 166, 167 and 168 (Other Respiratory System procedures with MCC, with CC and without CC/MCC, respectively).
