I. GENERAL INFORMATION

A. Background: The purpose of this Change Request (CR) is to implement changes to capture updates made to OLDS Error Messages in SAFE. SAFE captures changes made to an audited function in VMS. Currently, updates made within the OLDS are not captured by SAFE. When an operator updates Error Messages in OLDS, the DME MACs have no way of tracking what was present prior to the current entry. This enhancement will update VMS to add auditing functionality for Error Messages in OLDS.

B. Policy: There are no policy changes associated with this instruction.
