Assignment Available

Dear CIRM Reviewer,

Your application assignment for Clinical Program 2020-SEP is available to view on the CIRM review website at <https://grants.cirm.ca.gov>. Please read your assigned applications and enter your preliminary critique and score on the review website at least **1 day prior to the review meeting on Thursday, September 17, 2020**. If you have any questions for the applicant that you would like answered prior to the review

meeting please email them to Dr. Hayley Lam (hlam@cirm.ca.gov). Details on the review process as well as specific criteria for evaluating the applications will be available on the website.

As always, thanks for your time and help! Please feel free to contact Shyam (hlam@cirm.ca.gov) if you have any questions regarding review or Tricia (tchavira@cirm.ca.gov) if you need assistance.

Best,

CIRM Review Team

Hi Jana et al, attached are a few tables to discuss on our call tomorrow at 1PM EST (noon Minneapolis time). The tables are from a study call FLU 003. This cohort study has been ongoing since 2009, and a few years back we modified the protocol to extend enrollment to patients hospitalized with other respiratory diseases besides influenza. Most of the enrollments in 2020r have been COVID-19 patients. The tables give an idea of the specimens available and some data we collect as well one of frequency of one the outcomes, mortality. Follow-up is for 60 days following enrollment.

This is the study we thought might be useful for the work you wanted to do. Talk tomorrow

Thanks.

Jim

Jim Neaton is inviting you to a scheduled Zoom meeting.

Lori, Libby, Lisa and Laura,

Is there any chance we could have a call around 5:30 PM today to discuss the Palm 2 study informed by my recent visit to the DRC as well as the realities associated with the coronavirus outbreak?

Thanks,

Cliff

Subject: Fwd: Invitation to Register - Global Research and Innovation Forum: Towards a Roadmap for the 2019 Novel Coronavirus

Hi Gray,
This invitation just in. Thus far I have been involved on the R&D blueprint excellent and therapeutics trail design working group. The focus of that group at the moment is designing a therapeutics trail with room to severe as the top candidate which is the same drug as we are using in PALM two and PREVAIL 4.

Libby Higgs

30 January 2020

Dear Libby Higgs,

WHO R&D Blueprint

for action to prevent epidemics:

**Global research and innovation forum: towards a roadmap for the 2019 novel Coronavirus
WHO Executive Boardroom, 11-12 February 2020, Geneva, Switzerland**

On behalf of the World Health Organization (WHO), and the Global Research Collaboration for Infectious Disease Preparedness (GloPID-R), we have pleasure in inviting you, as a participant, to attend the above-mentioned 2-day in-person meeting to be held in Geneva, Switzerland, 11-12 February 2020. We plan to live-stream the plenary sessions for participants unable to travel.

The purpose of the forum is to bring together a group of key experts, partners and stakeholders to finalize the development of a *roadmap for the 2019 novel Coronavirus* in order to enable the conduct of research, product development and innovation. Such a roadmap will include an analysis of current capacities and ongoing efforts in affected countries and globally, and a review of the steps that the community should take to accelerate critical research. This meeting will assess the status of research and product development to fight the 2019 novel Coronavirus epidemic; including diagnostics, therapeutics, and prophylactics products as well as regulatory, ethical, social sciences, animal health, data / sample sharing and other considerations; to align on a cross-functional strategy to advance the countermeasures necessary to treat patients and control transmission.

The forum will be structured in a series of plenary and group sessions, the three main overall objectives being to

- *enable the joint identification of the main knowledge gaps and research priorities;*
- *foster an acceleration of the generation of scientific information; and*
- *promote the development and generation of priority medical countermeasures to control the 2019-nCoV emergency, through an effective collaborative approach.*

The main expected outcome will be to generate a concerted global research agenda, including priorities and frameworks for global coordination and implementation.

A complete set of the background documents will be available on your arrival in Geneva. The working language of the consultation will be English.

Please find a [Declaration of Interests Form](#) which we kindly request you to complete and return, as soon as possible and upload directly to the event registration site or email eventsregistration@gatesfoundation.org with document attached prior to the meeting.

Please [register here](#) as soon as possible.

Please note the following requirements for each registration:

WHO reg:

- Minimum of 15 min
- Create an account – then activate through email
- Cannot register with phone, must be on computer
- Need photo
- Need passport number

DOI:

- Be prepared to have an e-signature or print, sign, and scan the document

Should you require further details on the technical content of the consultation, please do not hesitate to contact Ms. Ximena Riveros Balta, email: [\(b\)\(6\)](mailto:(b)(6)@who.int) For any administrative queries related to this meeting, please contact Ms Neddy Mafunga, e-mail:

[\(b\)\(6\)](mailto:(b)(6)@who.int)

or

[\(b\)\(6\)](mailto:(b)(6)@who.int)

We look forward to hearing from you with regard to your participation.

Yours sincerely,

Dr. Soumya Swaminathan
WHO Chief Scientist

Dr. Mike Ryan
WHO Executive Director
Health Emergencies

Prof. Yazdan Yazhanpanah
GliPID-R Chair

Subject: New Republic Liberia: 300 Chinese Nationals Being Surveilled for Coronavirus

Safe travels next week!

300 Chinese Nationals Being Surveilled for Coronavirus

Liberian health authorities claim they are surveilling and tracking 300 Chinese and 11 Liberians that recently returned to Liberia from China, amid the outbreak of the coronavirus in China, a senator told parliament Thursday. "We are tracing all these people. We have information from the Liberian Immigration Service. These people will be quarantined for 10 to 12 days," Dr. Peter Coleman, chairman on Health in Liberia's upper house of parliament told colleagues on Thursday. He did not say where they would be quarantined. A senior immigration officer who declined to be name told TNR that "we have records on them. Where they went. Remember we have their contact details and is easy to track them down." Senator Coleman said, it is important for Liberians to be on alert and not to be taken by surprise in anyway. "We want to be on the alert and not to be caught pants down," he said.
