

NLM Extramural Research Program

Open NLM Research Grant Opportunities

Investigator-initiated R01 Research Project Grants in Biomedical Informatics and Data Science

- New methods and approaches to foster data-driven discovery in the biomedical and clinical health sciences
- Notice of special interest: reducing bias and other errors in health datasets and machine learning tools

Personal Health Libraries for Consumers and Patients

- Help individuals gather/manage/use information about their personal health

Computational Approaches to Curation at Scale

- Approaches to improve speed and scope of curation of digital research assets, make data FAIR

Open Small Business Innovation Research (SBIR) / Small Business Technology Transfer (STTR) Grant Opportunities

Generic Small Business Omnibus Solicitation SBIR/STTR

- Informatics R&D leading to commercialization
- AI techniques, modeling tools, prediction methods
- Notice of special interest in Fast Healthcare Interoperability Resources (FHIR)

SBIR/STTR Helping to End Addiction Long-Term (HEAL) Initiative

National Library of Medicine
