VSAC Collaboration

The screenshot displays the VSAC collaboration interface. At the top left is the VSAC logo (NLM Share). Below it is a navigation bar with links: My Dashboard, Sites, People, Repository, and More... On the right, there is a search bar with the text "Enter search terms..." and a user profile "pishing" with an "Invite" button and a "More" dropdown. Below the navigation bar is a blue header for "Medical Specialty" with sub-links: Site Dashboard, Wiki, Document Library, Discussions, Calendar, Links, Data Lists, Blog, and Members. The main content area shows a document library with a left sidebar containing "Documents", "Library", "Categories", and "Tags". The library view includes a toolbar with "Create Content...", "New Folder", "Upload", and "Selected Items...". The document list shows four items: "Reviewer documents" (folder, created about a year ago by pishing), "Supporting Documents" (folder, created about a year ago by pishing), "MedicalSpecialty.xls" (file, 63 KB, modified about a year ago by pishing), and "Sample-Flow.vsd" (file, 140 KB, created about a year ago by pishing). The list is sorted by name and has pagination controls "1 - 4 of 4 << 1 >>".

Intensional Value Set Development

- Discussion topic for September 18 Forum
- We need example queries.
- Send examples to custserv@nlm.nih.gov
(place VSAC in the subject line)

Example Intensional Queries

- Make a SNOMED CT value set using all the active descendants of code 284009009 “Route of administration (qualifier value)”
- Using RxNorm: Get prescribable oral tablet SCDs with ingredient=**11289** | Warfarin
- We are interested in your thought processes and real use cases. Not necessary for you to provide formal queries at this time.

Questions

**Send comments, questions, ideas and
intensional value sets to:**

custserv@nlm.nih.gov

(place VSAC in the subject line)
