

Summer Internship Program

National Center for Advancing Translational Sciences (NCATS) at the National Institutes of Health (NIH)

NCATS works to catalyze the generation of innovative methods and technologies that will enhance the development, testing and implementation of diagnostics and therapeutics across a wide range of human diseases and conditions. NCATS studies translation as a scientific and operational problem.

What NCATS, through its Division of Preclinical Innovation (DPI), offers paid summer research experiences within its exemplary intramural (i.e., onsite) training program. Seminars, career talks and journal clubs designed specifically for summer students are offered, and at the end of the summer, interns present their research in poster format, both at NCATS and on the NIH main campus in Bethesda, Maryland.

Who

- Undergraduate students
- Graduate students
- Professional school (e.g., medical, dental) students

When Students arrive at the NIH in May or early June for eight to 10 weeks, typically through the first full week of August.

Where NCATS' DPI is located just 10 miles from the NIH main campus at 9800 Medical Center Drive, Rockville, Maryland 20850.
