Additional Information
Sources

Intended Audience for this Webinar

1. Existing and prospective CCBHC Section 223
Demonstration state and clinic staff
2. CCBHC-Expansion (CCBHC-PDI and CCBHC-IA)
grant clinics and SAMHSA GPOs

Purpose of the Reporting Template

Purpose of Reporting Template

- Updated in 2024 to reflect quality measure updates
- The updated 2024 version of the CCBHC quality measures reporting template is used for states and clinics to report CCBHC quality measures data to SAMHSA.
- Users should use the template to report quality measures data starting with measurement year 2025, which starts on January 1, 2025.

Use for Section 223 Demonstration Program

Who: For the Section 223 Demonstration Program, CCBHCs report clinic-collected measures, using the reporting template, to their state. States, in turn, report all required measures to SAMHSA, which include the required state-collected measures and the clinic-collected measures.

Timing: For example: for MY 2025, clinics will report the templates with clinic-collected measures data to the state (per direction from the state) by September 30, 2026, and the state will report both the clinic-collected and the state-collected measures, to SAMHSA no later than December 31, 2026.

Method of submission: States will submit the reporting templates to SAMHSA via the CCBHCMeasuresSubmission@samhsa.hhs.gov mailbox. States will use separate templates for each clinic's quality measure results, including clinic-collected and state-collected measures for that clinic.

Note: MY=Measurement Year

Use for SAMHSA CCBHC-IA and CCBHC-PDI Grantees

Who: SAMHSA CCBHC-IA and CCBHC-PDI grantees report only required clinic-collected measures, using the template, to SAMHSA.

Timing: For example: for MY 2025, CCBHC-IAs and CCBHC-PDIs will report templates to SAMHSA no later than December 31, 2026. If the CCBHC is also part of the Section 223 Demonstration, the CCBHC should also adhere to the reporting requirements noted on the prior slide.

Method of submission: For grant reporting purposes, CCBHC-IAs and CCBHC-PDIs submit the reporting template via a mechanism currently being developed, which will be shared with clinics by the end of 2024.

Structure of the Reporting Template

Structure of Reporting Template Workbook

- Data issues
- Required measure stratifications
- Optional measure stratifications
- Case Load Characteristics instructions
- Section-by-section instructions for each measure template

The screenshot shows a Microsoft Word document with the following content:

2 Quality Measures Data Reporting Instructions

These templates are intended for states and Behavioral Health Clinic (BHCs) to report the set of Behavioral Health Clinic (BHC) quality measures that were updated in 2023. Users are referred to the 2023 Technical Specifications Resource Manual for additional instructions regarding each measure as well as general instructions for the BHC measure set as a whole.

3

4

5

6

7 Organization:

The templates are divided into 4 sections: 1) Clinic-Collected Measures Required for the CCBHC Demonstration; 2) Clinic-Collected Measures Optional for the CCBHC Demonstration; 3) State-Collected Measures Required for the CCBHC Demonstration; and 4) State-Collected Measures Optional for the CCBHC Demonstration, followed by a roll-up sheet that automatically populates with the stratified measure results.

Each measure has a separate worksheet. Data or other information may only be entered in the gray cells within the reporting template. Responses in the gray cells may be open text or may require a specific format. Clicking on the gray cells will reveal instructions and, where applicable, drop down menus will populate. Alterations to cells that are not gray is not allowed.

10 Data Issues:

Although states may not be accustomed to reporting data for measures with small denominators, for the CCBHC Demonstration Program, data for all required measures must be reported. Measures with denominators less than 30 should be reported but should not be used for Quality Bonus Payments by states, nor should such results be publicly reported. Results of quality measures with denominators less than 30 will be considered in the national evaluation only after aggregation to the state level by the evaluator, provided the denominator for the state is not less than 30. Measures with small denominators still may provide useful information for internal use by CCBHCs and states for internal quality improvement. Similarly, CCBHC-IAs or CCBHC-PDIs that are not part of the CCBHC Demonstration Program in their state should report data for required measures regardless of denominator size but results will not be publicly reported.

11

12

13 Required Measure Stratifications:

When administrative claims or encounter data are used for reporting, those data should be complete and final at the submission deadline.

The document's navigation pane at the bottom shows the following tabs: Cover Page, Instructions (selected), Clinic-Collected Required, Case Load Characteristics, ASC, CDF-AD, CDF-CH, and DEP-REM-6. The status bar at the bottom indicates 'Ready' and 'Accessibility: Investigate'.

Cover Sheets

The screenshot shows a spreadsheet with the following content:

	A	B
1		
2	Clinic-Collected Measures Required for the CCBHC Demonstration Program	
3	State Name:	
4	BHC Name:	
5	BHC Identifier:	
6	End of Worksheet	

At the bottom of the spreadsheet, there is a navigation bar with the following tabs: Cover Page, Instructions, Clinic-Collected Required (highlighted), Case Load Characteristics, ASC, CDF-AD, and CDF.

- Reporting template includes four cover sheets
- Cover sheets are included before each required and optional set of reporting templates
- Requires State Name, CCBHC Name and Identifier

Case Load Characteristics

Case Load Characteristics Worksheet: Basics

Completed by Section 223 Demonstration
CCBHCs

Categories:

- Age
- Sex
- Gender Identity (optional)
- Ethnicity
- Race
- Insurance Status
- Veteran or Military Status
- Total Clinic Population

Note: Data entry instructions present on all grey boxes when you click on them.

	A	B	C
2	Case Load Characteristics		
3	Characteristic	Number	Percent
4	Age		
5	0-11 years		
6	12-17 years		
7	18-64 years		
8	65+ years		
9	Sex		
10	Male		

Case Load Characteristics: Age

Age Categories:

- 0-11 years
- 12-17 years
- 18-64 years
- 65+ years

Total clinic population required at bottom for category percents to calculate

Please use the Age at the time of the first visit during the measurement year.

Total Case Load at Bottom of Worksheet

Characteristic	Number	Percent
Age		
0-11 years	50	2.0%
12-17 years	100	4.1%
18-64 years	2000	81.6%
65+ years	300	12.2%
Sex

Other Components within CCBHC Reporting Template

Template Components: A-C

Measure Title

Measure Source

- A. **Measurement Year:** Enter in grey cell
- B. **Data Source:** In this example, the expected source is medical records. Use drop down (shown) to select. If other, specify in row below. If medical records, use drop down in column D to select type (e.g., EHR).
- C. **Date Range for Measurement Period:** Enter start and end dates for data used for denominator and numerator in correct row.

Note: Data validation constraints will limit what can be entered.

	A	B	C	D
2	Screening for Depression and Follow-up Plan: Age 18 and Older (CDF-AD)			
3	Based on CMS Medicaid Adult Core Set (2023), stewarded by Centers for Medicare and Medicaid Services (CMS)			
4	A. Measurement Year:			
5	Insert Measurement Year.			2025
6	B. Data Source:			
7	Select the data source type (Medical Records or Other):			
8	If other data source selected, specify source:			
9	C. Date Range for Measurement Period:			
10	Denominator Start Date (mm/dd/yyyy)			
11	Denominator End Date (mm/dd/yyyy)			
12	Numerator Start Date (mm/dd/yyyy)			
13	Numerator End Date (mm/dd/yyyy)			

Template Component D: First Four Sections

SUBMEASURE 3: ALL CLIENTS WHO WERE SCREENED FOR UNHEALTHY ALCOHOL USE AND, IF IDENTIFIED AS AN UNHEALTHY ALCOHOL USER, RECEIVED BRIEF COUNSELING, OR WERE NOT IDENTIFIED AS AN UNHEALTHY ALCOHOL USER (Submeasure 3 is optional unless providers were reporting ASC as part of MIPS before 2017.)
 The measure is stratified to report by (1) payer, (2) ethnicity, and (3) race.

Stratification by Payer and Total Eligible Population

Measure	Numerator	Denominator	Rate (Percentage)
Medicaid			
Non-Medicaid (including dually eligible for Medicare and Medicaid)			
Total Eligible Population:		0	0

Stratification by Ethnicity (Hispanic or Latino) and Total Eligible Population

Measure	Numerator	Denominator	Rate (Percentage)
Not Hispanic or Latino			
Hispanic or Latino			
Unknown			
Total Eligible Population:		0	0

1

2

D. Performance Measure

1. Measure description
2. Rates stratified by payer and total eligible population

3. Rates stratified by ethnicity and total eligible population
4. Rates stratified by race and total eligible population

3

Stratification by Ethnicity (Hispanic or Latino) and Total Eligible Population

Measure	Numerator	Denominator	Rate (Percentage)
Not Hispanic or Latino			
Hispanic or Latino			
Unknown			
Total Eligible Population:		0	0

Stratification by Race and Total Eligible Population

Measure	Numerator	Denominator	Rate (Percentage)
White or Caucasian			
Black or African American			
American Indian or Alaska Native			
Asian			
Native Hawaiian or Other Pacific Islander			
More than one race			
Unknown			
Total Eligible Population:		0	0

4

Note: Please refer to 2024 quality measures technical specifications on how to report data based on stratifications

Template Components: E and F

E. Adherence to Measure Specifications

F. Additional Notes

The screenshot shows an Excel spreadsheet with the following content:

	A	B	C	D
32	American Indian or Alaska Native			
33	Asian			
34	Native Hawaiian or Other Pacific Islander			
35	More than one race			
36	Unknown			
37	Total Eligible Population:	0	0	
38	E. Adherence to Measure Specifications:			
39	Did you deviate from the measure specification in any way?		If Yes, the measure differs: Explain how your approach differed and why.	
40	Does this denominator represent your total measure eligible population as defined by the Technical Specifications for this measure?	Please use the drop down menu to answer this question.	No, the denominator doesn't represent your total eligible population, explain which populations are excluded and why:	
41	F. Additional Notes:			
42				
43	End of Worksheet			

The Excel ribbon is visible at the top, showing the Home tab with options for File, Insert, Page Layout, Formulas, Data, Review, View, Help, and Acrobat. The status bar at the bottom shows the current sheet is 'CDF-AD' and the workbook is '20231019_Demonstration223Templates_508_LOCKED'.

Rollup Report

- Automatically generates data from quality measures worksheets
- Used for CCBHCs and states to easily view data for quality measure results in one location

68	Native Hawaiian or Other Pacific Islander	0	0	
69	More than one race	0	0	
70	Unknown	0	0	
71	Total Eligible Population:	0	0	
72				
73	Screening for Depression and Follow-up Plan: Age 18 and Older (CDF-AD)			
74	Stratification by Payer and Total Eligible Population			
75	Measure	Numerator	Denominator	Rate (Percentage)
76	Medicaid	689	800	86.1%
77	Non-Medicaid (including dually eligible for Medicare and Medicaid)	445	600	74.2%
78	Total Eligible Population:	1134	1400	81.0%
79	Stratification by Ethnicity (Hispanic or Latino) and Total Eligible Population			
80	Measure	Numerator	Denominator	Rate (Percentage)
81	Not Hispanic or Latino	0	0	
82	Hispanic or Latino	0	0	
83	Unknown	0	0	
84	Total Eligible Population:	0	0	
85	Stratification by Race and Total Eligible Population			

Where to Get Information on the Templates

Reporting template can be found in SAMHSA's CCBHC website

[Quality Measures Guidance and Webinar Series | SAMHSA](#)

Template instructions, which is the second worksheet in the reporting template workbook

On each measure template, data entry guidance is provided when clicked on grey cells in the templates

Technical Specifications and Resource Manual > Section II > Reporting and Submission of Measures > Data-reporting templates. Manual also includes detailed measure specifications
