

SECTION 3

Total Money Income

Key Terms and Concepts for Section 3¹

Age. Age classification is based on the age of the person at his or her last birthday as of March 2013. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

Aged unit. With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

Marital status. Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

Race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

Hispanic origin. Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

Social Security beneficiary. A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

Family. A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

Poverty. The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor.

The ratio of Social Security income to total income. This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

Per beneficiary Social Security income is total Social Security income divided by the number of beneficiaries in the family.

Total Money Income. The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.

Social Security. Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

¹ For more information, consult the Glossary at the front of this publication.
