SSA Publication No. 13-11871  
Released: April 2016

---

## Preface

This report provides a broad income picture of a cross section of the population aged 55 or older, with special emphasis on income of the population aged 65 or older. The tabulations focus on the major sources and amounts of income in 2014, both separately and combined, for those age groups. The relative importance of particular sources to total income is measured for individual units, and the share of aggregate income from particular sources is measured for the aged as a whole. Proportions of the aged below the poverty line are presented in terms of the income of the families with whom they live. Several tables describe the economic situation of the aged with varying levels of Social Security benefits and total money income. These data are a valuable resource for policymakers and researchers in government and in the private sector.

Since 1941, the Social Security Administration (SSA) has periodically surveyed the economic situation of the aged as part of its legislative directive to study the most effective methods of providing economic security. Between 1963 and 1972, three national surveys were conducted that sampled nonbeneficiaries as well as beneficiaries. In 1963 and 1968, SSA administered its own questionnaire and combined data from those surveys with Social Security record data of the survey respondents. In 1972, SSA benefit record data were combined with U.S. Census Bureau data from the March Current Population Survey (CPS).

SSA then began a series of biennial studies of the income of the aged based on the CPS data alone. The first report in the series described the income of the population aged 55 or older, and in some cases the population aged 65 or older, using 1976 data. The second report described apparent changes in the income of those age groups between 1976 and 1978. In the interest of publishing the data in a more timely fashion, however, beginning with the 1980 report, publications in the series have consisted of tabulations only. Starting with the 1990 report, we expanded the series with a companion publication, *Income of the Aged Chartbook*, which highlights selected data in charts and tables for the population aged 65 or older.

Beginning with the expanded 2004 edition, we began publishing a broader range of statistics to meet user needs. Some of these changes include introducing new statistics on demographics and noncash benefits, as well as adding an Asian category for tabulations by race. In addition, we have substantially increased the number of tables on the family income of aged persons and reformatted or added some tables for consistency across sections. Text sections are included to further assist data users.

The source of data for this series is the March supplement of the CPS, which samples a large cross section of households in the United States each year and provides detailed information annually on income and labor force participation. Changes have been made in the survey from time to time that have improved the measurement of income and labor force participation but have reduced the comparability of estimates between years. Most recently, the CPS questionnaire was modified to improve the measurement of income generated from assets, including retirement accounts. While this reduces comparability, it is an improvement to the survey and addresses a deficiency particularly important to this publication. Users have correctly pointed out that past editions have not accounted for one-time withdrawals from retirement accounts, including 401(k) accounts. The improved CPS questionnaire directly addresses this issue, and now asks respondents about irregular withdrawals from retirement accounts. Despite any shortcomings, CPS data continue to provide the best available measures of income for detailed subgroups of the aged.

The data in this publication are presented in terms of either aged units or aged persons. An aged unit is defined as either a married couple living together or a nonmarried person. Using aged units or aged persons as the units of analysis allows one to measure incomes of the entire aged population either separately from or in combination with the income of other members of the families with whom they live. Beginning with the 2000 edition, poverty status is presented only for aged persons in terms of their family income, because that is consistent with the federal standard of measuring poverty.

Brad Trenkamp was responsible for the preparation of this report. Staff of the Office of Information Resources edited the report and prepared it for publication. This report and *Income of the Aged Chartbook* are available on our website at <https://www.socialsecurity.gov/policy>.

For questions pertaining to the data, please e-mail [income.pop55@ssa.gov](mailto:income.pop55@ssa.gov).

## Contents

### About This Report

About This Report . . . . .	1
Source of Data . . . . .	1
Glossary . . . . .	3
Demographic Concepts . . . . .	3
Income Definitions . . . . .	3
Receipts Not Counted As Income . . . . .	5
Other Key Concepts . . . . .	6
Technical Information for Constructing Income Measures from the CPS Survey Data . . . . .	7
Frequently Asked Questions . . . . .	11

### Section 1: Demographic Characteristics

Key Terms and Concepts for Section 1 . . . . .	16
--	----

#### Demographic Characteristics of Aged Persons

1.1 Percentage with characteristic, by sex, race, Hispanic origin, Social Security beneficiary status, and age, 2014. . . . .	17
1.2 Percentage of wives with characteristic, by husband's race, Hispanic origin, Social Security beneficiary status, and age, 2014 . . . . .	26
1.3 Percentage of husbands with characteristic, by wife's race, Hispanic origin, Social Security beneficiary status, and age, 2014 . . . . .	28

### Section 2: Income Sources

Key Terms and Concepts for Section 2 . . . . .	32
--	----

#### Income Sources of Aged Units

2.A1 Percentage with income from specified source, by marital status and age, 2014 . . . . .	34
---	----

2.A2 Percentage with income from specified source, by Social Security beneficiary status, marital status, and age, 2014 . . . . .	37
2.A3 Percentage with income from specified source, by marital status, race, Hispanic origin, and age, 2014 . . . . .	39
2.A4 Percentage with income from specified source, by Social Security beneficiary status, race, Hispanic origin, and age, 2014 . . . . .	42
2.A5 Percentage distribution of units with number and type of retirement benefits, by marital status, age, and receipt of earnings and income from assets, 2014. . . . .	44

#### Income Sources of Units 65 or Older

2.A6 Percentage with income from specified source, by marital status and quintile of total money income, 2014 . . . . .	47
--	----

#### Income Sources of Beneficiary Units 65 or Older

2.A7 Percentage of Social Security beneficiary aged units with income from specified source, by proportion of income from Social Security and marital status, 2014 . . . . .	48
--	----

#### Family Income Sources of Aged Persons

2.B1 Percentage with family income from specified source, by sex, marital status, and age, 2014 . . . . .	49
2.B2 Percentage with family income from specified source, by family's Social Security beneficiary status and aged person's sex and age, 2014 . . . . .	56
2.B3 Percentage with family income from specified source, by sex, marital status, race, Hispanic origin, and age, 2014 . . . . .	59
2.B4 Percentage with family income from specified source, by family's Social Security beneficiary status and aged person's race, Hispanic origin, and age, 2014. . . . .	65

#### Family Income Sources of Nonmarried Aged Persons

2.B5 Percentage with family income from specified source, by sex, marital status, and age, 2014 . . . . .	67
--	----

### Family Income Sources of Persons 65 or Older

- 2.B6 Percentage with family income from specified source, by number of persons in family and quintile of per-capita family total money income, 2014 . . . . . 69
- 2.B7 Percentage with family income from specified source, by sex and ratio of family total money income to the poverty threshold, 2014 . . . . . 73

### Family Income Sources of Persons 65 or Older in Beneficiary Families

- 2.B8 Percentage with family income from specified source, by proportion of family income from Social Security and sex, 2014 . . . . . 74

## Section 3: Total Money Income

- Key Terms and Concepts for Section 3 . . . . . 76

### Total Money Income of Aged Units

- 3.A1 Percentage distribution, by marital status and age, 2014 . . . . . 77
- 3.A2 Percentage distribution, by Social Security beneficiary status, marital status, and age, 2014 . . . . . 80
- 3.A3 Percentage distribution, by marital status, race, Hispanic origin, and age, 2014 . . . . . 82
- 3.A4 Percentage distribution, by Social Security beneficiary status, race, Hispanic origin, and age, 2014 . . . . . 85

### Total Money Income of Aged Units 65 or Older

- 3.A5 Number and median income of those receiving retirement benefits, by marital status and receipt of earnings and income from assets, 2014 . . . . . 87

### Total Money Income of Beneficiary Units 65 or Older

- 3.A6 Percentage distribution of beneficiary units, by marital status and quintiles of Social Security benefits, 2014 . . . . . 89

### Total Money Income Excluding Social Security of Aged Units

- 3.A7 Percentage distribution of aged units and Social Security beneficiary units, by marital status and age, 2014 . . . . . 90

### Total Money Income of Beneficiary Aged Units 65 or Older

- 3.A8 Percentage distribution of Social Security beneficiary aged units, by proportion of income from Social Security and marital status, 2014 . . . . . 92

### Family Total Money Income of Aged Persons

- 3.B1 Percentage distribution, by sex, marital status, and age, 2014 . . . . . 93
- 3.B2 Percentage distribution, by family's Social Security beneficiary status and aged person's sex, marital status, and age, 2014 . . . . . 100
- 3.B3 Percentage distribution, by sex, marital status, race, Hispanic origin, and age, 2014 . . . . . 106
- 3.B4 Percentage distribution, by family's Social Security beneficiary status and aged person's race, Hispanic origin, and age, 2014 . . . . . 113

### Family Total Money Income of Persons 65 or Older

- 3.B5 Percentage distribution of persons in beneficiary families, by quintile of per-beneficiary Social Security benefits, 2014 . . . . . 115
- 3.B6 Percentage distribution of persons in beneficiary families, by number of Social Security beneficiaries in family and quintile of per-beneficiary Social Security benefits, 2014 . . . . . 116

### Family Total Money Income Excluding Social Security of Aged Persons

- 3.B7 Percentage distribution of aged persons and aged persons in Social Security beneficiary families, by family beneficiary status, sex, marital status, and age, 2014 . . . . . 119

### Family Total Money Income of Persons 65 or Older in Beneficiary Families

- 3.B8 Percentage distribution of persons in beneficiary families, by proportion of family income from Social Security and sex, 2014 . . . . . 125

## Section 4: Income from Earnings

Key Terms and Concepts for Section 4 . . . . .	128
<b>Earnings Income of Aged Units</b>	
4.A1 Percentage distribution of recipient units, by age, 2014. . . . .	129
4.A2 Percentage distribution of recipient units, by marital status and age, 2014 . . . . .	130
4.A3 Percentage distribution of recipient units, by Social Security beneficiary status, marital status, and age, 2014 . . . . .	131
<b>Earnings Income of Units 65 or Older</b>	
4.A4 Percentage distribution of recipient units, by race, Hispanic origin, and marital status, 2014 . . . . .	132
4.A5 Percentage distribution of recipient units, by marital status and quintile of total money income, 2014 . . . . .	133
<b>Family Earnings Income of Aged Persons</b>	
4.B1 Percentage distribution of persons in recipient families, by sex and age, 2014 . . . . .	134
<b>Family Earnings Income of Persons 65 or Older</b>	
4.B2 Percentage distribution of persons in recipient families, by sex and age, 2014 . . . . .	135
4.B3 Percentage distribution of persons in recipient families, by sex and marital status, 2014 . . . . .	136
4.B4 Percentage distribution of persons in recipient families, by Social Security beneficiary status, sex and marital status, 2014 . . . . .	137
4.B5 Percentage distribution of persons in recipient families, by race, Hispanic origin, and sex, 2014 . . . . .	138
4.B6 Percentage distribution of persons in recipient families, by quintile of per-capita family total money income, 2014. . . . .	139
4.B7 Percentage distribution of persons in recipient families, by number of persons in family and quintile of per-capita family total money income, 2014 . . . . .	140

## Section 5: Income from Social Security

Key Terms and Concepts for Section 5 . . . . .	144
<b>Social Security Income of Aged Units</b>	
5.A1 Percentage distribution of beneficiary units, by age, 2014 . . . . .	145
5.A2 Percentage distribution of beneficiary units, by marital status and age, 2014 . . . . .	146
<b>Social Security Income of Units 65 or Older</b>	
5.A3 Percentage distribution of beneficiary units, by race, Hispanic origin, and marital status, 2014 . . . . .	147
5.A4 Percentage distribution of beneficiary units, by marital status and quintile of total money income, 2014. . . . .	148
5.A5 Percentage distribution of Social Security beneficiary units, by proportion of aged unit income from Social Security and marital status, 2014 . . . . .	149
<b>Family Social Security Income of Aged Persons</b>	
5.B1 Percentage distribution of persons in Social Security beneficiary families, by sex and age, 2014 . . . . .	150
<b>Family Social Security Income of Persons 65 or Older</b>	
5.B2 Percentage distribution of persons in Social Security beneficiary families, by sex and age, 2014 . . . . .	151
5.B3 Percentage distribution of persons in Social Security beneficiary families, by sex and marital status, 2014 . . . . .	152
5.B4 Percentage distribution of persons in Social Security beneficiary families, by race, Hispanic origin, and sex, 2014 . . . . .	153
5.B5 Percentage distribution of persons in Social Security beneficiary families, by quintile of per-capita total family money income, 2014. . . . .	154
5.B6 Percentage distribution of persons in Social Security beneficiary families, by number of persons in family and quintile of per-capita total family money income, 2014 . . . . .	155
5.B7 Percentage distribution of persons in Social Security beneficiary families, by proportion of family income from Social Security and sex, 2014 . . . . .	158

**Section 6:  
Income from Pensions**

Key Terms and Concepts for Section 6 . . . . .	160
<b>Pension Income of Aged Units</b>	
6.A1 Percentage distribution of recipient units, by type of pension and age, 2014 . . . . .	161
6.A2 Percentage distribution of recipient units, by type of pension, marital status, and age, 2014 . . . . .	164
6.A3 Percentage distribution of recipient units, by type of pension, Social Security beneficiary status, marital status, and age, 2014 . . . . .	167
<b>Pension Income of Units 65 or Older</b>	
6.A4 Percentage distribution of recipient units, by type of pension, race, Hispanic origin, and marital status, 2014 . . . . .	170
6.A5 Percentage distribution of recipient units, by type of pension, marital status, and quintile of total money income, 2014 . . . . .	173
<b>Family Pension Income of Aged Persons</b>	
6.B1 Percentage distribution of persons in recipient families, by sex, type of pension, and age, 2014 . . . . .	176
<b>Family Pension Income of Persons 65 or Older</b>	
6.B2 Percentage distribution of persons in recipient families, by type of pension, sex, and age, 2014 . . . . .	179
6.B3 Percentage distribution of persons in recipient families, by type of pension, sex, and marital status, 2014 . . . . .	182
6.B4 Percentage distribution of persons in recipient families, by type of pension, Social Security beneficiary status, sex, and marital status, 2014 . . . . .	185
6.B5 Percentage distribution of persons in recipient families, by type of pension, race, Hispanic origin, and sex, 2014 . . . . .	188
6.B6 Percentage distribution of persons in recipient families, by type of pension and quintiles of per-capita total family money income, 2014. . . . .	191
6.B7 Percentage distribution of persons in recipient families, by type of pension, number of persons in family, and quintiles of per-capita total family money income, 2014 . . . . .	194

**Section 7:  
Income from Assets**

Key Terms and Concepts for Section 7 . . . . .	204
<b>Asset Income of Aged Units</b>	
7.A1 Percentage distribution of recipient units, by age, 2014. . . . .	205
7.A2 Percentage distribution of recipient units, by marital status and age, 2014 . . . . .	206
7.A3 Percentage distribution of recipient units, by Social Security beneficiary status, marital status, and age, 2014 . . . . .	207
<b>Asset Income of Units 65 or Older</b>	
7.A4 Percentage distribution of recipient units, by race, Hispanic origin, and marital status, 2014 . . . . .	208
7.A5 Percentage distribution of recipient units, by marital status and quintile of total money income, 2014 . . . . .	209
<b>Family Asset Income of Aged Persons</b>	
7.B1 Percentage distribution of persons in recipient families, by sex and age, 2014 . . . . .	210
<b>Family Asset Income of Persons 65 or Older</b>	
7.B2 Percentage distribution of persons in recipient families, by sex and age, 2014 . . . . .	211
7.B3 Percentage distribution of persons in recipient families, by sex and marital status, 2014 . . . . .	212
7.B4 Percentage distribution of persons in recipient families, by Social Security beneficiary status, and aged person's sex and marital status, 2014. . . . .	213
7.B5 Percentage distribution of persons in recipient families, by race, Hispanic origin, and sex, 2014 . . . . .	214
7.B6 Percentage distribution of persons in recipient families, by quintile of per-capita total family money income, 2014. . . . .	215
7.B7 Percentage distribution of persons in recipient families, by number of persons in family and quintile of per-capita total family money income, 2014 . . . . .	216

**Section 8:  
Importance of Income Sources  
Relative to Total Income**

Key Terms and Concepts for Section 8 . . . . .	220
<b>Relative Importance of Income Sources for Aged Units</b>	
8.A1 Percentage distribution of units, by source of income and age, 2014 . . . . .	221
8.A2 Percentage distribution of units, by source of income, marital status, and age, 2014 . . . . .	225
8.A3 Percentage distribution of units, by source of income, Social Security beneficiary status, marital status, and age, 2014 . . . . .	229
<b>Relative Importance of Income Sources for Units 65 or Older</b>	
8.A4 Percentage distribution of units, by source of income, race, Hispanic origin, and marital status, 2014 . . . . .	233
8.A5 Percentage distribution of units, by source of income, marital status, and quintile of total money income, 2014 . . . . .	237
<b>Relative Importance of Family Income Sources for Aged Persons</b>	
8.B1 Percentage distribution, by source of family income, sex, and age, 2014 . . . . .	241
<b>Relative Importance of Family Income Sources for Persons 65 or Older</b>	
8.B2 Percentage distribution, by income source, sex, and age, 2014 . . . . .	245
8.B3 Percentage distribution, by income source, sex, and marital status, 2014 . . . . .	249
8.B4 Percentage distribution, by source of family income, family Social Security beneficiary status, sex, and marital status, 2014 . . . . .	253
8.B5 Percentage distribution, by source of family income, race, Hispanic origin, and sex, 2014. . . . .	257
8.B6 Percentage distribution, by source of family income, race, Hispanic origin, sex, and marital status, 2014 . . . . .	261

8.B7 Percentage distribution, by source of family income and quintile of per-capita family total money income, 2014 . . . . .	265
8.B8 Percentage distribution, by source of family income, number of persons in family, and quintile of per-capita family total money income, 2014 . . . . .	269
8.B9 Percentage distribution, by source of family income, sex, and ratio of family total money income to the poverty threshold, 2014 . . . . .	280

**Section 9:  
Importance of Social Security Relative  
to Total Income (Beneficiary Aged Units and  
Aged Persons in Beneficiary Families Only)**

Key Terms and Concepts for Section 9 . . . . .	286
<b>Relative Importance of Social Security for Beneficiary Aged Units</b>	
9.A1 Percentage distribution of beneficiary units, by age, 2014 . . . . .	287
9.A2 Percentage distribution of beneficiary units, by marital status and age, 2014 . . . . .	288
<b>Relative Importance of Social Security for Beneficiary Units 65 or Older</b>	
9.A3 Percentage distribution of beneficiary units, by race, Hispanic origin, and marital status, 2014 . . . . .	289
9.A4 Percentage distribution of beneficiary units, by marital status and quintile of total money income, 2014 . . . . .	290
<b>Relative Importance of Social Security for Persons in Beneficiary Families</b>	
9.B1 Percentage distribution of persons in beneficiary families, by sex and age, 2014 . . . . .	291
<b>Relative Importance of Social Security for Persons 65 or Older in Beneficiary Families</b>	
9.B2 Percentage distribution of persons in beneficiary families, by sex and age, 2014 . . . . .	292
9.B3 Percentage distribution of persons in beneficiary families, by sex and marital status, 2014 . . . . .	293

9.B4	Percentage distribution of persons in beneficiary families, by race, Hispanic origin, and sex, 2014 . . . . .	294
9.B5	Percentage distribution of persons in beneficiary families, by race, Hispanic origin, sex, and marital status, 2014 . . . . .	295
9.B6	Percentage distribution of persons in beneficiary families, by quintile of per-capita total family money income, 2014. . . . .	296
9.B7	Percentage distribution of persons in beneficiary families, by number of persons in family and quintile of per-capita family total money income, 2014 . . . . .	297
9.B8	Percentage distribution of persons in beneficiary families, by sex and ratio of family total money income to the poverty threshold, 2014 . . . . .	299

**Section 10:  
Shares of Aggregate Income, by Source**

Key Terms and Concepts for Section 10. . . . .		302
<b>Shares of Aggregate Income for Aged Units</b>		
10.1	Percentage of aggregate income of aged units from specified source, by age, 2014 . . . . .	303
10.2	Percentage of aggregate income of aged units from specified source, by marital status and age, 2014 . . . . .	304
10.3	Percentage of aggregate income of aged units from specified source, by beneficiary status, marital status, and age, 2014 . . . . .	305
<b>Shares of Aggregate Income for Units 65 or Older</b>		
10.4	Percentage of aggregate income of aged units from specified source, by race, Hispanic origin, and marital status, 2014 . . . . .	306
10.5	Percentage of aggregate income of aged units from specified source, by marital status and quintile of total money income, 2014. . . . .	307

**Section 11:  
Poverty Status of Aged Persons  
Based on Family Income**

Key Terms and Concepts for Section 11. . . . .		310
<b>Poverty Status of Aged Persons Based on Family Income</b>		
11.1	By Social Security beneficiary status, marital status, race, Hispanic origin, sex, and age, 2014 . . . . .	311
<b>Poverty Status of Persons 65 or Older Based on Family Income</b>		
11.2	By Social Security beneficiary status, marital status, race, Hispanic origin, sex, and age, 2014 . . . . .	314
11.3	Social Security beneficiaries, by marital status, race, Hispanic origin, sex and age, 2014 . . . . .	317
<b>Poverty Status of Persons 65 or Older in Beneficiary Families Based on Family Income</b>		
11.4	Persons in Social Security beneficiary families, by proportion of family income from Social Security, sex, and age, 2014 . . . . .	320

**Appendix**

Technical Appendix . . . . .	321

## About This Report

This biennial report presents detailed statistical information on the major sources and amounts of income for people aged 55 or older. The tabulations focus on the major sources of total income by age, sex, marital status, race, and Hispanic origin. Several tables describe the economic situation of the aged with varying levels of Social Security benefits. Their poverty status is presented in terms of the income of the families they live with.

### Source of Data

---

Data for this series are from the March Current Population Survey (CPS) of the U.S. Census Bureau.<sup>1</sup> The CPS samples a large cross section of households in the United States each year (approximately 100,000 in March 2015). The March Supplement gathers detailed information on income and labor force participation of each person aged 15 or older in the sample

households. For this series, the Social Security Administration (SSA) creates a subsample of persons 55 or older and their families. For aged units, a separate data record is made for each married couple living together—at least one of whom is 55 or older—and for each nonmarried person 55 or older. Married persons living apart are classified as nonmarried persons.

From time to time, changes have been made in the survey. Although the changes have improved the measurement of income and labor force participation, they have reduced the comparability of estimates made in different years.<sup>2</sup> The most recent of these changes was implemented in the March 2015 CPS, which is used in this publication. In an effort to produce better data on income from retirement accounts and other assets, the portion of the questionnaire devoted to these items was modified. The new questionnaire has improved income reporting,

increased response rates, and reduced reporting errors by updating questions on retirement income and taking better advantage of an automated questionnaire environment. Users of this publication have noted the failure of past editions to account for the income from irregular withdrawals from retirement accounts. The recent changes to the CPS should fill the gap left by prior editions. However, users should take into account the changes when making comparisons to past editions. CPS data continues to be the best option for timely, detailed information about the income sources and demographics of the population aged 55 or older.

Users of this publication are encouraged to consult the text in the Glossary, Frequently Asked Questions, and Technical Appendix sections. These sections provide detail about the CPS and how income is measured in this publication.

---

<sup>1</sup> For a detailed description of the basic CPS sample design, see U.S. Census Bureau, *Current Population Survey: Design and Methodology*, Technical Paper No. 63RV (Washington, DC: Government Printing Office, March 2002).

---

<sup>2</sup> These changes are discussed in some detail in U.S. Census Bureau, *Current Population Reports*, Series P60, various years.

---

## Glossary

*Income of the Population 55 or Older* is derived from the public-use file of the March Annual Social and Economic Supplement to the Current Population Survey. For this reason, most definitions in this Glossary are taken directly from documentation of the Current Population Survey and publications of the U.S. Census Bureau; when appropriate, the source of each definition is noted. The aged unit is not a concept used by the Census Bureau and as a result, no citation is given.

Information and definitions of concepts described here (except the aged unit and demographic characteristics of the aged unit) can be found at <https://www.census.gov/programs-surveys/cps/technical-documentation/subject-definitions.html>. Further discussion of income sources and receipts not counted as income is taken from the Glossary for the March 2015 Current Population Survey, available at <http://www2.census.gov/programs-surveys/cps/techdocs/cpsmar15.pdf>.

### **Demographic Concepts**

---

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and nonmarried persons 55 or older. Persons who are separated or married but not living with their spouse are included in the nonmarried persons category.

Certain differences exist between Census Bureau and SSA figures because the units of analysis are not directly comparable. Aged persons living with a younger relative who is considered the householder are classified by the Census Bureau as members of nonaged families. Also, nonmarried individuals are treated simply as nonmarried persons by SSA. In comparison, the Census Bureau counts nonmarried persons living with other relatives as part of a family and nonmarried persons who are living alone or with nonrelatives as unrelated individuals. The Census Bureau's family category includes both married couples and those nonmarried persons who are living with relatives.

Census data show that the number of households with the householder aged 65 or older was 29,946,000 in 2014.<sup>1</sup> In comparison, SSA tabulations show that there were 45,994,000 persons and 34,614,000 units aged 65 or older in 2014. The SSA count generally includes the Census Bureau's aged households plus some aged units living in non-aged households or living with other aged units in the same household. The number of aged households was 87 percent of the number of aged units.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of

---

<sup>1</sup> DeNavas-Walt, Carmen, and Bernadette D. Proctor, U.S. Census Bureau, Current Population Reports, P60-252, *Income and Poverty in the United States: 2014*, Table 1. <https://www.census.gov/library/publications/2015/demo/p60-252.html>.

one family.<sup>2</sup> In this publication, individuals living with no other family members are referred to as "1-person families."

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** A person's race is his or her reported race. A married couple's race is defined as the race of the husband. Beginning with the 2002 edition, respondents were allowed to report more than one race. The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of these changes, data on race are not directly comparable to editions prior to 2002, and one should use caution when interpreting changes in the racial composition of the elderly over time. In 2002, less than 1 percent of persons aged 55 or older reported more than one race.

### **Income Definitions**

---

Money income data are collected for all people 15 or older in the sample. Money income includes earnings, unemployment compensation, workers' compensation, Social Security, Supplemental Security Income, public assistance, veterans' payments, survivor benefits, pension or retirement income, interest, dividends, rents, royalties, income from estates and trusts, educational assistance, alimony,

---

<sup>2</sup> U.S. Census Bureau. *Current Population Survey (CPS)—Subject Definitions*. <https://www.census.gov/programs-surveys/cps/technical-documentation/subject-definitions.html>.

child support, cash assistance from outside the household, and other miscellaneous sources. It is income before deductions for taxes or other expenses and does not include lump-sum payments or capital gains.<sup>3</sup>

**Total Money Income.** The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.<sup>4</sup>

### **Earnings is the sum of income from wages and salaries and income from self-employment.**

**Wages and salaries.** Money wages or salary is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed persons in incorporated businesses are considered wage and salary.<sup>5</sup>

**Self-employment.** Income from self-employment is the combined income from farm and nonfarm self-employment.

Farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on their own account, as an owner, as a renter, or as a shareholder. Nonfarm self-employment is net money income (gross receipts minus expenses) from

<sup>5</sup> Ibid.

## ***How Income Is Measured***

“For each person 15 years and older in the sample, the Annual Social and Economic Supplement (ASEC) asks questions on the amount of money income received in the preceding calendar year. . . .

It should be noted that although the income statistics refer to receipts during the preceding calendar year, the demographic characteristics, such as age, labor force status, and household composition, are as of the survey date. The income of the household does not include amounts received by people who were members during all or part of the previous year if these people no longer resided in the household at the time of interview. The Current Population Survey (CPS) collects income data for people who are current residents but did not reside in the household during the previous year.

Data on income collected in the ASEC by the U.S. Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive noncash benefits, such as SNAP benefits, health benefits, subsidized housing, and goods produced and consumed on the farm. In addition, money income does not reflect the fact that noncash benefits are also received by some nonfarm residents, which often take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc. Data users should consider these elements when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to underreport their income. Based on an analysis of independently derived income estimates, the Census Bureau determined that respondents report income earned from wages or salaries much better than other sources of income, and that the reported wage and salary income is nearly equal to independent estimates of aggregate income.” (Source: DeNavas-Walt, Carmen, and Bernadette D. Proctor, U.S. Census Bureau, Current Population Reports, P60-252, *Income and Poverty in the United States: 2014*, page 21. <https://www.census.gov/library/publications/2015/demo/p60-252.html>).

one’s own business, professional enterprise, or partnership.<sup>6</sup>

### **Retirement benefits is the sum of Social Security benefits and public and private pensions.**

**Social Security.** Social Security includes retired-worker benefits, dependents’ or survivor benefits, and disability benefits made by the Social Security Administration prior to deductions for medical insurance and railroad retirement insurance checks from the U.S. Government. “Medicare” reimbursements

are not included.<sup>7</sup> For further information on types of Social Security benefits, see *Social Security’s Annual Statistical Supplement, 2014*, pages 15–17.

**Pensions.** Many employers and unions have established pension programs for their employees so that upon retirement employees will receive regular income to replace their earnings. Many of these programs also provide income to employees if they become severely disabled, or to their survivors upon death. Other types of retirement income include annuities and paid-up life insurance policies. Some people purchase

---

<sup>6</sup> Ibid.

annuities that yield a set amount over a certain number of years. Other people may convert their paid-up life insurance policy into an annuity after they retire.<sup>8</sup>

**Employer pensions.** Employer pensions include pensions from Railroad Retirement, government employee pensions, and private pensions and annuities.

**Government employee pensions.** Government employee pensions include payments from federal government (civil service), military, and state or local governments.

**Private pensions and annuities.** Private pensions and annuities include payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

### **Asset income includes interest, dividends, income from estates or trusts, and net rental income or royalties.**

**Interest income.** Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest.<sup>9</sup>

**Dividends.** Dividends include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income.<sup>10</sup>

<sup>10</sup> Ibid.

### **Rents, royalties, and estates and trusts.**

Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.<sup>11</sup>

### **Cash public assistance includes Supplemental Security Income and other public assistance.**

**Supplemental Security Income.** Includes federal, state, and local welfare agency payments to low-income people who are 65 years old and over or people of any age who are blind or disabled.<sup>12</sup>

For more information on the SSI program, see “Supplemental Security Income (SSI)” (SSA Publication No. 05-11000). You may also want to read the introductory material in “Understanding Supplemental Security Income.” (Source: FAQ #3798 or visit <https://www.socialsecurity.gov>.)

**Other Public Assistance.** Includes cash public assistance payments low-income people receive, such as Aid to Families with Dependent Children (AFDC, ADC), temporary assistance to needy families (TANF), general assistance, and emergency assistance.<sup>13</sup>

### **Other income is total income minus earnings, Social Security, pensions, asset income, and cash public assistance; included are unemployment and workers’ compensation, veterans’ payments, and personal contributions.**

**Unemployment compensation.** Includes payments the respondent received from government unemployment agencies or private companies during periods of unemployment and

---

<sup>11</sup> Ibid.

<sup>12</sup> Ibid.

<sup>13</sup> Ibid.

any strike benefits the respondent received from union funds.<sup>14</sup>

**Workers’ compensation.** Includes payments people receive periodically from public or private insurance companies for injuries received at work.<sup>15</sup>

**Veterans’ payments.** Include payments disabled members of the armed forces or survivors of deceased veterans receive periodically from the Department of Veterans Affairs for education and on-the-job training, and means-tested assistance to veterans.<sup>16</sup>

**Personal contributions.** Include child support, alimony, and financial assistance from friends and relatives.

---

### **Receipts Not Counted As Income**

Receipts from the following sources are not included as income: (1) capital gains people received (or losses they incur) from the sale of property, including stocks, bonds, a house, or a car (unless the person was engaged in the business of selling such property, in which case the CPS counts the net proceeds as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances or insurance payments.<sup>17</sup>

**Noncash benefits** include Supplemental Nutrition Assistance Program benefits (SNAP benefits, formerly food stamps), energy assistance, and housing assistance. Receipt of noncash benefits is only reported in the section on the sources of income received. No dollar values are assigned to the noncash benefits

---

<sup>14</sup> Ibid.

<sup>15</sup> Ibid.

<sup>16</sup> Ibid.

<sup>17</sup> Ibid.

in this publication, and they are not included in total money income. A person or aged unit is indicated as having received a noncash benefit if any person in the household received food, energy, or housing assistance.

**Food.** In this publication, food noncash benefits are comprised solely of Supplemental Nutrition Assistance Program benefits (SNAP benefits, formerly food stamps). School breakfast, lunch, and other food assistance programs are not covered. The Food Stamp Act of 1977 was enacted for the purpose of increasing the food purchasing power of eligible households through the use of coupons to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers SNAP through state and local welfare offices. SNAP is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (for example, sex, age, disability, etc.).<sup>18</sup>

**Energy Assistance Program.** The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs. The program is funded by the federal government and administered by the States under broad guidelines.<sup>19</sup>

**Housing Assistance.** There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans. Under a rent supplement plan the difference between the “fair

---

<sup>18</sup> U.S. Census Bureau. *Current Population Survey (CPS)—Glossary*. <http://www2.census.gov/programs-surveys/cps/techdocs/cpsmar15.pdf>.

<sup>19</sup> Ibid.

market” rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low-income tenants in the form of lower rent charges. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

Housing assistance questions differ from other questions covering noncash benefits in that they establish current reciprocity status in March 2015 rather than reciprocity status during 2014.<sup>20</sup>

### **Other Key Concepts**

**Poverty.** Following the Office of Management and Budget’s (OMB’s) Directive 14, the Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family’s total income is less than that family’s threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and SNAP benefits).

Poverty statistics are based on a definition developed by Mollie Orshansky of the Social Security Administration (SSA) in 1964 and revised in 1969 and 1981 by interagency committees. This definition was established as the official definition of poverty for statistical use in all Executive departments in 1969 (in Bureau of the Budget Circular No. A-46) and was reconfirmed in the Office of Management

---

<sup>20</sup> Ibid.

and Budget Statistical Policy Directive No. 14. For further details, see the section, “Changes in the Definition of Poverty,” in *Current Population Reports, Series P-60, No. 133*.

The poverty thresholds are increased each year by the same percentage as the annual average Consumer Price Index (CPI). The poverty thresholds are currently adjusted using the annual average CPI-U (1982–84 = 100).

For further information on how the poverty thresholds were developed and subsequent changes in them, see Gordon M. Fisher, “The Development and History of the Poverty Thresholds,” *Social Security Bulletin*, vol. 55, no. 4, Winter 1992, pp. 3–14.<sup>21</sup>

Discussions of alternative measures of poverty are available in Citro and Michael (1995).<sup>22</sup> The U.S. Census Bureau also publishes data on alternative measures of poverty; for more information, see <https://www.census.gov/prod/2005pubs/p60-227.pdf>.

**Relative Importance of Income Source.** The relative importance of a source is the ratio of the amount of income from a given source to total income.

**Aggregate Income Share.** An aggregate income share is the ratio of the amount of income from a given source to total income for an entire subpopulation. Aggregate income share tables are distributions of dollars by source.

## Technical Information for Constructing Income Measures from the CPS Survey Data

The information provided here is intended to help users familiar with working with survey data to reproduce statistics in this publication or construct additional comparable measures. For questions regarding the survey variables themselves, please consult the technical documentation for the March 2015 CPS (<http://www2.census.gov/programs-surveys/cps/techdocs/cpsmar15.pdf>).

### Assigning persons to aged units

An aged unit can be either a nonmarried person or a married couple. The person record is used for nonmarried persons (A-MARITL equals 3, 4, 5, 6, or 7). To create a married couple, a person with A-MARITL equals 1 or 2 is assigned to his or her spouse by matching A-LINENO of one person to the A-SPOUSE of another person in the same household (PH-SEQ is the same for both persons).

### Variables used to calculate income

These are the income variables for an individual. To obtain total income for an aged unit, sum amounts over the married couple or over the nonmarried person. To obtain family totals, sum over all family members (those with the same FH-SEQ and FFPOS).

## Frequently Asked Questions

### There are statistics for aged units and the family income of persons. What is the difference? Which statistics should I use?

The wider variety of tables incorporated in this edition gives more options to users needing information on the income of the aged. The questions asked about the income of the elderly often fall into one of two categories: what income do the elderly provide for themselves and those they live with, and what income is available as a resource for the elderly.

Statistics for aged units treat each marital unit (married couple or nonmarried individual) as one unit. A nonmarried individual has only their income and demographic attributes. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife. All other demographic characteristics, including the statistical weight, are that of the husband. Income for the married couple is the sum of both spouses' income; if either spouse has income from a specific source the married couple is considered to be a recipient unit. Tables on aged unit income are designed to be flexible enough to answer both types of questions, but with a couple of qualifications. First, unlike tables in which each person counts as a unit, aged unit tables treat each married couple as 1 unit and each nonmarried person as 1 unit. Interpreting aged unit tables like a person table will emphasize the economic well-being of nonmarried persons relative to married persons. Second, the aged unit tables exclude the income of other family members, which may not provide a complete picture of the resources available to the unit.

Statistics for the family income of persons are also based on the demographic attributes (age, sex, race, Hispanic origin) of each person. Total income from all family members (related through blood, marriage, or adoption) is treated as another attribute of the person. If any person in the family has income from a specific source the aged person is considered to be in a recipient family. These tables are designed to answer questions on the resources available to an aged person.

The table below illustrating the differences across units for total money income is taken from Tables 3.A1 and 3.B1. Median income is higher for aged units than it is for persons because aged unit income includes spousal income. Family income of persons 65 or older is higher still because it includes income from all family members, not just a spouse. The number (thousands) is the same for persons and family income of persons because only the attribute of interest (person versus family income) has changed; both are concerned with the same population—persons 65 or older. The number of aged units is lower because a married couple is counted as 1 unit, not 2 persons.

	Persons 65 or older (unpub- lished)	Aged units 65 or older	Family income of persons 65 or older
Median income (dollars)	21,264	30,193	43,000
Number (thousands)	45,994	34,614	45,994

### I have seen other statistics on the income of the elderly that are different from these. What would cause these differences?

Statistics may differ across publications because different data are used. *Income of the Population 55 or Older* uses the March Supplement to the Current Population Survey, which is conducted by the U.S. Census Bureau. Some publications producing statistics on the income of the elderly may use other surveys like the Survey of Income and Program Participation or the Health and Retirement Survey. Still other publications, such as Social Security's *Annual Statistical Supplement*, use administrative data.

Different publications also may not employ the same procedures for similar statistics. The units (persons, aged units, families, households, and so forth) may differ. One methodology may exclude income or units that another does not.

The statistics below on the average amount of money the elderly received from Social Security illustrate these points. The first column shows the number of beneficiary aged units 65 or older and median Social Security income from Table 5.A1. The second column shows the number of beneficiaries and average benefit from Table 5.A16 of the *Annual Statistical Supplement, 2015*. The number of beneficiaries differs because two different sources of data and two different units were used. The *Annual Statistical Supplement* statistics are based on administrative records from Social Security's Master Beneficiary Record drawn for December 2014. The administrative records include institutionalized beneficiaries (for example, in nursing homes and hospitals) and do not rely on accurate self-reporting by the beneficiary to a survey. The benefit amounts differ not only

because the data are different, but also because the *Income of the Population* statistic is the median of the annual amount received and the *Annual Statistical Supplement* statistic is the mean of the monthly benefit in December 2014.

	<i>Income of the Population</i> Table 5.A1	<i>Supplement</i> Table 5.A16
Beneficiary aged units 65 or older (thousands)	29,150	...
Beneficiaries 65 or older (thousands)	...	41,996
Median Social Security income (dollars)	17,760	...
Average monthly benefit (dollars)	...	1,309.11
Average monthly benefit (annualized)	...	15,709.32

### Why are there only 4 quintile limits?

The quintile limits indicate the boundaries between the quintiles. The bottom quintile has income below the lowest quintile limit with no lower boundary. Likewise, the top quintile has income of at least the highest quintile limit with no upper boundary. The middle quintiles are bounded on the top and bottom by the quintile limits.

### Why isn't Social Security differentiated by type of benefit?

Social Security is not broken out by type of benefit because a person may receive more than one type of Social Security benefit (such as retired-worker benefit and spouse benefit). Aged units and families may have even more combinations of benefits (such as one spouse receiving retired-worker benefits and the other

receiving disability benefits). For this reason, it also should not be assumed that beneficiary units 65 or older or persons 65 or older in beneficiary families are receiving retirement benefits, even though disability benefits are converted to retired-worker benefits at full retirement age.

### What is the difference between the relative importance of an income source in Sections 8 and 9 and a source's share of aggregate income in Section 10?

The most important difference between the two concepts is that the relative importance of an income source is based on aged units/family income of persons, while a share of aggregate income is an average over dollars. This means that the relative importance of Social Security for an aged unit is calculated by dividing each aged unit's Social Security income by its total income. Based on the ratio of Social Security income to total income, aged units are then placed in the appropriate row of the table (0 percent of income from Social Security, 1 percent to 19 percent of income from Social Security, and so forth). Only aged units with positive total income and nonnegative earnings and asset income are included. The mean at the bottom of each panel is an average of the ratio of Social Security income to total income. The measures of relative importance of income sources in Sections 8 and 9 are designed to examine the resources available to an elderly person or aged unit.

On the other hand, aggregate income shares are designed to answer the question of what income sources the elderly as a whole are providing to their living units. Income provided by the nonelderly is excluded (except in the case of aged units because spouses may be non-elderly). The Social Security share of aggregate income for persons 65 or older is the total number of dollars of Social Security received by persons 65 or older divided by the total

number of dollars received by the elderly from all sources of income. Only the total number of dollars matters for aggregate income shares; neither the number of persons or aged units nor the distribution of money is taken into account.

### I can't find the information I need. What are some other sources of data?

A good source of data on Social Security benefits and Supplemental Security Income is in Social Security Administration's *Annual Statistical Supplement*. It and other data publications from Social Security are located on Social Security Administration Office of Retirement and Disability Policy's website, [https://www.socialsecurity.gov/policy/data\\_title.html](https://www.socialsecurity.gov/policy/data_title.html).

The Census Bureau also has a series of publications based on the Current Population Survey, the most recent of which is called *Income and Poverty in the United States: 2014*. Several years of these reports can be accessed through the Census Bureau's Income website, <https://www.census.gov/hhes/www/income/income.html>. The Internal Revenue Service's Statistics of Income Division produces data on income that is accessible through its website, <https://www.irs.gov/uac/Tax-Stats-2>.

The Bureau of Labor Statistics produces a series of reports on consumption from its Consumer Expenditure Survey. These reports and other data on consumption can be found at <http://www.bls.gov/cex/>. Data on wealth are included in the Survey of Consumer Finances (Federal Reserve Board, <https://www.federalreserve.gov/econresdata/scf/scfindex.htm>), the Panel Study of Income Dynamics (University of Michigan, <https://www.psidonline.isr.umich.edu/>), and through the Census Bureau's Housing and Household Economic Statistics Division (<https://www.census.gov/people/wealth/>). Data on health, retirement, and aging are available in the Health and Retirement

Study sponsored by the National Institute on Aging (University of Michigan, <http://hrsonline.isr.umich.edu/>).

**Whom do I contact?**

If you have questions about how the statistics in this publication were calculated, please e-mail [income.pop55@ssa.gov](mailto:income.pop55@ssa.gov). If you have questions regarding the Current Population Survey, please visit the Census Bureau's CPS website <https://www.census.gov/programs-surveys/cps.html>. The technical documentation for the March 2015 Supplement is located at <http://www2.census.gov/programs-surveys/cps/techdocs/cpsmar15.pdf>. If you have questions regarding your personal Social Security records, including benefits and earnings history, please call 1-800-772-1213, visit <https://www.socialsecurity.gov/onlineservices/> or contact your local Social Security field office.

# SECTION 1

## Demographic Characteristics

## Key Terms and Concepts for Section 1 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

# SECTION 2

## Income Sources

## Key Terms and Concepts for Section 2 <sup>1</sup>

### **Table characteristics**

---

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor.

**Per capita income.** Per capita income is total family income divided by the number of persons in the family.

**The ratio of Social Security income to total income.** This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

### **Income sources**

---

#### **Earnings**

**Wages and salaries.** Wages and salaries is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed persons in incorporated businesses are considered wage and salary.

**Self-employment.** Income from self-employment is the combined income from farm and nonfarm self-employment.

#### **Retirement benefits**

**Social Security.** Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

**Government employee pensions.** Government employee pensions include payments from federal government (civil service), military, and state or local governments.

**Private pensions and annuities.** Private pensions and annuities include payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

#### **Asset income**

**Interest income.** Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest.

**Dividends.** Dividends include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income.

**Rents, royalties, and estates and trusts.** Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

#### **Other income**

**Unemployment compensation.** Includes payments the respondent received from government unemployment agencies or private companies during periods of unemployment and any strike benefits the respondent received from union funds.

---

<sup>1</sup> For more information, consult the Glossary at the front of this publication.

**Workers' compensation.** Includes payments people receive periodically from public or private insurance companies for injuries received at work.

**Veterans' payments.** Include payments disabled members of the armed forces or survivors of deceased veterans receive periodically from the Department of Veterans Affairs for education and on-the-job training, and means-tested assistance to veterans.

**Personal contributions.** Include child support, alimony, and financial assistance from friends and relatives.

### **Public Assistance—Cash benefits**

**Supplemental Security Income.** Supplemental Security Income includes payments made by federal, State, and local welfare agencies to low-income persons who are aged (65 or older), blind, or disabled, and who have limited income and financial resources.

**Other Public Assistance.** Includes cash public assistance payments low-income people receive, such as Aid to Families with Dependent Children (AFDC, ADC), temporary assistance to needy families (TANF), general assistance, and emergency assistance.

### **Public Assistance—Noncash Benefits**

**Noncash benefits.** Include SNAP benefits, energy assistance, and housing assistance. Receipt of noncash benefits is only reported in the section on the sources of income received. No dollar values are assigned to the noncash benefits in this publication, and they are not included in total money income. A person or aged unit is indicated as having received a noncash benefit if any person in the household received food, energy, or housing assistance.

**Food.** In this publication, food noncash benefits are comprised solely of SNAP benefits.

**Energy.** The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs.

**Housing.** There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans.

## Income Sources of Aged Units

NOTE: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

# SECTION 3

## Total Money Income

## Key Terms and Concepts for Section 3 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor.

**The ratio of Social Security income to total income.** This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

**Per beneficiary Social Security income** is total Social Security income divided by the number of beneficiaries in the family.

**Total Money Income.** The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.

**Social Security.** Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

# SECTION 4

## Income from Earnings

## Key Terms and Concepts for Section 4 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Earnings.** Include wages and salaries and self employment. *Wages and salaries* are defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed persons in incorporated businesses are considered wage and salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

# SECTION 5

## Income from Social Security

## Key Terms and Concepts for Section 5 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**The ratio of Social Security income to total income.** This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

---

<sup>1</sup> For more information, consult the Glossary at the front of this publication.

# SECTION 6

## Income from Pensions

## Key Terms and Concepts for Section 6 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to

the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Employer pensions.** Employer pensions include pensions from Railroad Retirement, government employee pensions, and private pensions and annuities.

**Government employee pensions.** Government employee pensions include payments from federal government (civil service), military, and state or local governments.

**Private pensions and annuities.** Private pensions and annuities include payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

a. Fewer than 75,000 weighted cases.

# SECTION 7

## Income from Assets

## Key Terms and Concepts for Section 7 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to

the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Asset income.** Includes interest, dividends, income from estates or trusts, and net rental income or royalties. *Interest* income. Interest includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. *Dividends.* *Dividends* include income people receive from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts.* Include net income people receive from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

# SECTION 8

## Importance of Income Sources Relative to Total Income

## Key Terms and Concepts for Section 8 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Per capita income.** Per capita income is total family income divided by the number of persons in the family.

**Relative Importance of Income Source.** The relative importance of a source is the ratio of the amount of income from a given source to total income for an aged unit or family. These tables are distributions of persons or aged units by the importance of a given source at the individual unit level.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and SNAP benefits).

### Income sources

**Retirement benefits.** Include Social Security benefits, Railroad Retirement income, government employee pensions, and private pensions or annuities.

**Social Security.** Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

**Government employee pensions.** Government employee pensions include payments from federal government (civil service), military, and state or local governments.

**Private pensions and annuities.** Private pensions and annuities include payments from companies or unions, annuities or paid-up insurance policies, individual retirement accounts (IRAs), Keogh, or 401(k) payments.

**Earnings.** Include wages and salaries and self-employment. *Wages and salaries* is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed persons in incorporated businesses are considered wage and salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

**Asset income.** Includes income from interest, dividends, rent, royalties, and estates and trusts. *Interest* includes payments people receive (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. *Dividends* include income from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts* includes net income from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

**Public Assistance.** Includes Supplemental Security Income and other monetary public assistance programs. Noncash benefits are not included.

NOTES: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Units with zero total income or with negative total income, earnings, or income from assets are excluded.

Quintile limits are \$13,499, \$23,592, \$39,298, and \$72,129 for all units; \$27,538, \$44,424, \$67,621, and \$108,703 for married couples; and \$10,859, \$16,552, \$24,400, and \$41,151 for nonmarried persons.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

Per-capita family total money income quintile limits are \$12,492, \$19,245, \$29,027, and \$47,129.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

## Relative Importance of Family Income Sources for Persons 65 or Older

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The family money income of aged persons is compared with the official poverty lines of families in 2014.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

# SECTION 9

## Importance of Social Security Relative to Total Income (Beneficiary Aged Units and Aged Persons in Beneficiary Families Only)

## Key Terms and Concepts for Section 9 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Per capita income.** Per capita income is total family income divided by the number of persons in the family.

**Relative Importance of Income Source.** The relative importance of a source is the ratio of the amount of income from a given source to total income for an aged unit or family. These tables are distributions of persons or aged units by the importance of a given source at the individual unit level.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and SNAP benefits).

---

<sup>1</sup> For more information, consult the Glossary at the front of this publication.

**Table 9.A1**  
**Percentage distribution of beneficiary units, by age, 2014**

Proportion of income	Aged 55–61	Aged 62–64	Aged 65 or older					
			Total	65–69	70–74	75–79	80 or older

## Relative Importance of Social Security for Persons 65 or Older in Beneficiary Families

**Table 9.B7**

**Percentage distribution of persons in beneficiary families, by number of persons in family and quintile of per-capita family total money income, 2014—Continued**

Proportion of family income	Total	First	Second	Third	Fourth	Fifth
<i>Persons in families of 3 or more</i>						
Total percent	100.0	100.0	100.0	100.0	100.0	100.0
1–19	36.2	10.5	22.3	37.5	53.2	80.4
20–39	30.6	23.4	32.0	37.5	37.2	19.6
40–59	15.9	20.2	24.0	18.7	9.3	0.0
60–79	7.7	15.4	13.4	5.1	0.3	0.0
80 or more	9.4	30.5	8.3	1.2	0.0	0.0
50 or more	23.0	55.0	30.9	12.5	2.1	0.0
90 or more	6.9	24.2	4.7	0.0	0.0	0.0
100	4.0	16.1	0.6	0.0	0.0	0.0
Mean proportion	35.0	58.1	41.1	28.9	21.3	13.1
Number (thousands)	5,403	1,314	1,143	1,154	1,132	659

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

Per-capita family total money income quintile limits are \$12,492, \$19,245, \$29,027, and \$47,129.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

NOTES: Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

The family money income of aged persons is compared with the official poverty lines of families in 2014.

The relative importance of a source of income may not accurately reflect the resources available to elderly persons or elderly aged units. The survey on which these data are based does not include some potentially important resources as income, including lump-sum pension payments and capital gains. In addition, these statistics do not take into consideration noncash benefits that supplement money income (housing and energy subsidies or SNAP benefits) or the amount of savings available to supplement monthly income. Consult the Frequently Asked Questions for further information.

# SECTION 10

## Shares of Aggregate Income, by Source

## Key Terms and Concepts for Section 10 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and SNAP benefits).

### Income sources

**Retirement benefits.** Include Social Security benefits, Railroad Retirement income, government employee pensions, and private pensions or annuities.

**Social Security.** Includes retired-worker benefits, dependents' or survivor benefits, disability benefits, and transitionally insured benefits.

**Government employee pensions.** Include payments from federal (civil service), military, state or local governments.

**Private pensions or annuities** include payments from: companies or unions; annuities or paid-up insurance policies; and payments from individual retirement accounts (IRAs), Keogh, or 401(k) payments; or other retirement income.

**Earnings.** Include wages and salaries and self-employment. *Wages and salaries* is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments,

and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, and so forth. Earnings for self-employed persons in incorporated businesses are considered wage and salary. *Self-employment* is the combined income from farm and nonfarm self-employment.

**Asset income.** Includes income from interest, dividends, rent, royalties, and estates and trusts. *Interest* includes payments people received (or have credited to their accounts) from bonds, treasury notes, IRAs, certificates of deposit, interest-bearing savings and checking accounts, and all other investments that pay interest. *Dividends* include income from stock holdings and mutual fund shares. The CPS does not include capital gains from the sale of stock holdings as income. *Rents, royalties, and estates and trusts* includes net income from the rental of a house, store, or other property, receipts from boarders or lodgers, net royalty income, and periodic payments from estate or trust funds.

**Public Assistance.** Includes Supplemental Security Income and other monetary public assistance programs. Noncash benefits are not included.

**Other income** is total income minus retirement benefits, earnings, income from assets, and public assistance. Some income sources represented in this category include worker's compensation, unemployment benefits, alimony, child support, and financial assistance from friends and relatives.

---

NOTE: Quintile limits are \$13,499, \$23,592, \$39,298, and \$72,129 for all units; \$27,538, \$44,424, \$67,621, and \$108,703 for married couples; and \$10,859, \$16,552, \$24,400, and \$41,151 for nonmarried persons.

# SECTION 11

## Poverty Status of Aged Persons Based on Family Income

## Key Terms and Concepts for Section 11 <sup>1</sup>

**Age.** Age classification is based on the age of the person at his or her last birthday as of March 2015. A married couple's age is defined as the age of the husband—unless he is under age 55 and the wife is 55 or older, in which case it is the age of the wife.

**Aged unit.** With age 55 as the cutoff, aged units are defined as married couples living together—at least one of whom is 55 or older—and non-married persons 55 or older.

**Marital status.** Married persons are married and living with their spouse. Nonmarried persons may be divorced, widowed, never married, separated, or married but living apart from their spouse.

**Race.** The categories White alone, Black alone, and Asian alone reflect respondents who reported only one race. Because of changes to the race category, data on race are not directly

comparable to editions prior to 2002. A person's race is his or her reported race. A married couple's race is defined as the race of the husband.

**Hispanic origin.** Persons of Hispanic origin may be of any race. A married couple is of Hispanic origin if the husband is of Hispanic origin.

**Family.** A family is a group of two or more people (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related sub-family members) are considered as members of one family.

**Social Security beneficiary.** A beneficiary may be receiving retired-worker benefits, dependents' or survivor benefits, disability benefits, or transitionally insured benefits.

**Per capita income.** Per capita income is total family income divided by the number of persons in the family.

**Poverty.** The Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation with the Consumer Price Index (CPI-U). The official poverty definition counts money income before taxes and excludes capital gains and noncash benefits (such as public housing, Medicaid, and SNAP benefits).

**The ratio of Social Security income to total income.** This ratio is defined as Social Security income divided by total income. Units and persons in families with less than \$1 of total income or negative earnings or asset income are excluded from these tables.

NOTES: The family money income of aged persons is compared with the official poverty lines of families in 2014. Persons in families with zero total income or with negative total income, earnings, or income from assets are excluded.

## Technical Appendix

This appendix addresses the most frequently encountered mathematical operations when using this book. The first segment involves manipulation of the data. The second segment addresses the reliability of the estimates. For more information on manipulating the data, please consult a mathematics or statistics textbook. For more information on calculating the reliability of the estimates, please consult the technical documentation for the March 2015 Survey at <http://www2.census.gov/programs-surveys/cps/techdocs/cpsmar15.pdf>.

### Manipulating the data

#### Converting a percentage of a population to a count of units

First, divide the percentage by 100. Then multiply that decimal by the total population.

Example: How many aged units 65 or older have income from Veterans' benefits?

In Table 2.A1, 5.0 percent of aged units 65 or older had income from Veterans' benefits, and there was a total of 34,614,000 aged units 65 or older. Dividing the percentage by 100 yields:  $5.0 \div 100 = 0.050$ . Then multiply:  $0.050 \times 34,614,000 = 1,730,700$ .

#### Combining two percentage distributions

First, convert each percentage to a count of units. Then add the two counts of interest. Finally, divide by the sum of the two total populations.

Example: What percentage of aged units 65–74 had total money income of \$15,000–\$19,999?

In Table 3.A1, 7.5 percent of aged units 65–69 and 9.7 percent of aged units 70–74 had total money income of \$15,000–\$19,999. There were a total of 11,056,000 aged units 65–69 and 8,053,000 aged units 70–74.

First, find the number of aged units with total money income of \$15,000–\$19,999:

$0.075 \times 11,056,000 = 829,200$  aged units 65–69 had total money income of \$15,000–\$19,999

$0.097 \times 8,053,000 = 781,141$  aged units 70–74 had total money income of \$15,000–\$19,999

$829,200 + 781,141 = 1,610,341$  aged units 65–74 had total money income of \$15,000–\$19,999

Second, find the total population:

$11,056,000$  (aged units 65–69) +  $8,053,000$  (aged units 70–74) =  $19,109,000$  aged units 65–74

Finally, divide the population of interest by the total population:

$1,610,341 \div 19,109,000 = 0.084$  or 8.4 percent of aged units 65–74 had total money income of \$15,000–\$19,999.

Note: This procedure cannot be used on medians or some means presented in this publication.

#### Estimating a particular percentile limit

This is also known as getting a cumulative distribution from a frequency distribution. Add percentages in the frequency distribution (column) until you exceed the percentile limit you want. Then interpolate within that last interval to estimate your desired percentile (see example below).

Example: What was the Social Security income cutoff for the bottom decile (10 percent) of beneficiary aged units 65 or older?

In Table 5.A1, get the total percent (cumulative distribution) by adding up the percents in the aged units 65 or older column until you exceed 10 percent. Because 8,000–8,999 is the first row to exceed 10 percent total, the 10-percent limit is between \$8,000 and \$8,999.

Next look at the total percent immediately lower than 10 percent (here it's 8.4). So,  $10 - 8.4 = 1.6$  means that you need 1.6 percentage points more of the population. There are 2.8 percentage points in the 8,000–8,999 category. Take the proportion  $1.6/2.8$  (what you need/what you have) and multiply it by 1,000 (the total number of dollars for the row category).  $(1.6/2.8) \times 1,000 = \$571$ . Add 571 to 8,000 (the bottom dollar for the row). The bottom decile limit is 8,571.

Social Security (dollars)	Percent	Social Security (dollars)	Total percent
1–499	0.1	< 500	0.1
500–999	0.2	< 1,000	0.3
1,000–1,499	0.3	< 1,500	0.6
1,500–1,999	0.3	< 2,000	0.9
2,000–2,499	0.4	< 2,500	1.3
2,500–2,999	0.3	< 3,000	1.6
3,000–3,499	0.5	< 3,500	2.1
3,500–3,999	0.5	< 4,000	2.6
4,000–4,499	0.3	< 4,500	2.9
4,500–4,999	0.6	< 5,000	3.5
5,000–5,999	0.9	< 6,000	4.4
6,000–6,999	1.7	< 7,000	6.1
7,000–7,999	2.3	< 8,000	8.4
8,000–8,999	2.8	< 9,000	11.2

### Reliability of the Estimates

Because the figures in this report are based on a sample of the older population, all reported statistics (counts, percentages, and medians) are only estimates of population parameters and may deviate somewhat from their true values—that is, from the values that would have been obtained from a complete census using the same questionnaires, instructions, and interviewers.

The standard error is primarily a measure of sampling variability—that is, it measures the variations that occur by chance because a sample rather than the entire population is surveyed. As calculated for this report, the standard error also partly measures the effect of response and enumeration errors but does not measure systematic biases in the data. The chances are about 68 out of 100 that an estimate for the sample would differ from a complete census figure by less than the standard error. The chances are about 95 out of 100 that the difference would be less than twice the standard error.

### Standard Error of Estimated Percentages

The reliability of an estimated percentage, computed by using sample data for both numerator and denominator, depends on both the size of the percentage and the size of the total on which the percentage is based. The approximate standard error  $S_{x,p}$  of an estimated percentage can be obtained using the formula

$$s_{x,p} = \sqrt{\frac{b}{x} p(100 - p)}$$

Here  $x$  is the total number of persons, families, or households (the base of the percentage),  $p$  is the percentage, and  $b$  is the parameter from the following table associated with the characteristic in the numerator of the percentage.

Characteristics	Total or white	Black	Asian	Hispanic
Below poverty level	2,441	2,441	2,441	2,441
All income levels	1,526	1,747	1,747	1,747
People by family income	3,047	3,488	3,488	3,488

Use of this formula in calculating the standard error of a single percentage is illustrated as follows:

An estimated 44.7 percent of units aged 65 or older had total money income of \$30,000 or more in 2014 (Table 3.A1). Because the base of this percentage is approximately 34,614,000—the number of units aged 65 or older—the standard error of the estimated 44.7 percent is approximately 0.3 percent. The chances are 68 out of 100 that the estimate would have shown a figure that differed from one resulting from a complete census by less than 0.3 percent. The chances are 95 out of 100 that the estimate would have shown a figure differing from one after a complete census by less than 0.6 percent—that is, this 95 percent confidence interval would range from 44.1 percent to 45.3 percent.

For a difference between two sample estimates, the standard error is approximately equal to the square root of the sum of the squares of the standard errors of each estimate considered separately. This formula will represent the actual standard error quite accurately for the difference between separate and uncorrelated characteristics. If, however, there is a high positive correlation between the two characteristics, the formula will overestimate the true standard error.

A comparison of the difference in the percentage of units aged 62 to 64 and 65 or older who had total money income of \$30,000 or more in 2014 illustrates how to calculate the standard error of a difference between two percentages:

44.7 percent of the 34,614,000 units aged 65 or older and 57.5 percent of the 7,673,000 units aged 62 to 64 had total money income of \$30,000 or more in 2014 (Table 3.A1)—a difference of 12.8 percentage points. The standard errors of those percentages are 0.3 and 0.7, respectively. The standard error of the estimated difference of 12.8 percentage points is about

$$0.8 = \sqrt{(0.3)^2 + (0.7)^2}$$

The chances are 68 out of 100 that the difference is between 12.0 and 13.6 percentage points and 95 out of 100 that it is between 11.2 and 14.4 percentage points. Because the confidence interval around the difference does not include zero, there is a statistically significant difference between the proportions of units who are aged 62 to 64 and those who are aged 65 or older with income of \$30,000 or more.

---

### ***Confidence Limits of Medians***

---

The sampling variability of an estimated median depends on the distribution as well as on the size of the base. Confidence limits of a median based on sample data may be estimated as follows: (1) using the appropriate base, the standard error of a 50 percent characteristic is determined; (2) the standard error determined in step 1 is added to and subtracted from 50 percent; and (3) the confidence interval around the median corresponding to the two points estimated in step 2 is then read from the distribution of the characteristic. A two-standard-error confidence limit may be determined by finding the values corresponding to 50 percent plus and minus twice the standard error. This procedure may be illustrated as follows:

The median total money income of the estimated 34,614,000 units aged 65 or older was \$30,193 in 2014 (Table 3.A1). The standard error of 50 percent of those units expressed as a percentage is about 0.33 percent. As interest usually centers on the confidence interval for the median at the two-standard-error level, it is necessary to add and subtract twice the standard error obtained in step 1 from 50 percent. This procedure yields limits of approximately 49.3 percent and 50.7 percent. By interpolation, 49.3 percent of units aged 65 or older had total money income below \$29,106, and 50.7 percent had total money income below \$30,764. Thus, the chances are about 95 out of 100 that the census would have shown the median to be greater than \$29,106 but less than \$30,764.
